MEETING OF AMITY TO BE HELD SOON

Bellaire, O. (AP)—Meeting of amity, sponsored by Catholics, Protestants and Jews and designed to bring together members of all creeds and non-believers, will be held here March 11.

Believed to be the first of its kind ever planned in Ohio, the meeting will be in the nature of a concordat with good fellowship as its keynote.

The affair has been sponsored by the Knights of Columbus, the Bellaire Ministerial Association and the Independent Order of B'nai B'rith. Each organization has selected a representative to confer as a committee which includes Julius Weill, John A. McVey and Vernon H. Whipple.

One of the first announcements of the committee was that the meeting would not be a revival or religious gathering. Controversial subjects will be banned. The chairman selected as Mayor A. J. Crumelle, will introduce three speakers, one from each sponsoring organization who will plead for tolerance, sympathy and understanding among Bellaire citizens.

MAGNETISM USED TO BUILD RESISTANCE

Detroit (AP)—An electrical treatment which gives plants and animals protection from diseases is described by the American Association for the Advancement of Science by Dr. R. A. Muttikowski, professor of biology at Detroit university.

Living things are exposed to magnetism created by electric currents. The important point in the Detroit experiments, Dr. Muttikowski reports, is interruption of this magnetic influence during part of each second, so living cells get a rest.

Other scientists have shown that uninterrupted exposure of simple forms of life to similar electrical effects, seems to make them live more rapidly, yet their death comes more quickly.

To avoid death, Dr. Muttikowski gives this rest period. With paramecia, single-cell animals, those that lived in the magnetic field for a time were able to survive experiments that killed ordinary paramecia. Under the treatment, pea and bean seeds also developed powers of resistance to molds that destroy untreated seed.

CHINESE NEWSPAPER UNDER STATE BAN

Beiping, (AP)—Just as the Chinese editors in the north were beginning to believe that they were to be given greater freedom, the editor of the Peiping Min Kuo Jih Pao has been arrested and the newspaper suppressed.

The other Chinese newspapers report the arrest and suppression, but do not state the cause of the action.

The suppression of this paper is particularly surprising, because it was believed to be the local organ of the Kuomintang.

Owatonna, Minn. (AP)—As a result of a recent tubercular cattle test, Steele county was placed in the list of Minnesota tubercular free counties. The test revealed two hundredths of one-percent infection.

Because they do not wish the sport to die out, farmers in the vicinity of Sedgwick, Ireland, have asked the local hunt club to resume hunting.

WOLVES DISAPPEAR
Boise, Idaho (AP)—Quite different from the days, not so many years past, when wolves and other wild predatory animals ran in numbers through the hills and on the prairies of Idaho, the Gem state is so devoid of wolves that during the past year not a single wolf kill was reported to the predatory animal control bureau of the biological survey.
