

ARTHUR HADLEY DIES ON CRUISE AROUND WORLD

New Haven, Conn. (AP)—Death has overtaken Dr. Arthur Twining Hadley, president emeritus of Yale university, in Kobe, Japan, during a world cruise. He was 72 years old and president of the university from 1899 to 1921. Stricken with pneumonia, the noted educator, writer, lecturer and economist died Wednesday after a two-day illness.

News of his death was received here Wednesday night. He sailed with Mrs. Hadley from New York on December 3 on the Empress of Australia.

Hamilton Hadley, New York lawyer, a son, said that news of his father's death came as a great shock. A cablegram from his parents a few days ago reported both in good health, he said.

Dr. Hadley, Yale's 13th president, retired 22 years later and after one of the most notable administrations in the history of the university to devote his entire time to the study of economics, to writing and lecturing.

Dr. Hadley's body will be sent here for burial after it is brought from Japan to San Francisco by expected to arrive in that city on March 21. Services will be held in Battell chapel at Yale and interment will be in Grove Street cemetery.

When Arthur Twining Hadley resigned the presidency of Yale university in 1921 he carried out an intention expressed 22 years previously. Shortly after his election as head of the university in 1899 he informed the board of trustees that he would retire from the presidency when he reached the age of 65 and more than a year before arriving at that age reminded the corporation of his determination to do so.

It was said of President Hadley that his knowledge covered a wide range of subjects and that no other university president or professor.

As a Yale professor his intellectual passion was railroad transportation, but there was hardly a subject in the college catalogue which he could not teach. He spoke all the European languages freely and it was said there were few dead or living that he could not read with understanding.

His attainments, however, were not all strictly academic. He was regarded as the best chess and whist player in New Haven. He was apt at tennis, a celebrated pedestrian and Alpine climber; he was supposed to understand football strategy, at least on the offensive side, better than Walter Camp; he was fond of discussing baseball and had one fixed idea, which he would debate for hours, that it would be a better game if played with ten men instead of nine. He was greatly interested in military strategy, and in particular was an authority on the strategic side of Napoleon's campaigns. Once again a circus he surprised the elephant keeper by his encyclopedic information on elephants.

Arthur Twining Hadley was born in New Haven, Conn., April 23, 1858, the only child of the late Professor James Hadley, of Yale college, and of Annie Twining Hadley. He was prepared for college at the Hopkins Grammar School, (New Haven) and entered Yale in 1877. He was elected to Delta Kappa Chi in his sophomore year, and Delta Kappa Epsilon in his junior year. He was also a member of the Senior Society of Skull and Bones.

He was valedictorian of his class and took Woolsey and Bristol scholarships. He was the recipient of Winthrop prizes for "students most thoroughly acquainted with the Greek and Latin poets," the Clarke prize for solution of astronomical problems, and one of the Townsend prizes for English composition.

He studied political science in New Haven for a year after his graduation in 1876 and continued his studies for the next two years at the University of Berlin. On his return from Europe in the autumn of 1879, he was made a tutor in Yale college, giving instruction in Greek, logic, German and Roman law. His tutelage ended in 1883, and about that time began his work in the field of the history and science of railroad transportation, in which he accomplished considerable important work, and raised himself to the position of an acknowledged authority. From 1883 to 1885 he was university lecturer on railroad administration. In the latter year he was appointed professor of political science in the graduate department, and in 1891 he was transferred to the chair of political economy in Yale college, which he held till his election to the presidency in 1899.

During these years of marked success as a teacher in the college, Mr. Hadley developed his useful capacity for carrying on different lines of important work at the same time. In 1890-91 he was act-

PIRATES CALIFORNIA-BOUND

The first contingent of Pirates Pittsburgh for their training camp in Pano Robles, Cal. Left to right: Ralston Hemeley, catcher; Jewell Ens, manager; John O'Connell, catcher; Max Carey, coach; George Astor, assistant trainer; Sam Dreyfus, vice-president; Charles Hargreaves, catcher, and Leon Chagnon, pitcher.

Effective Method for Combatting Menace Of the Cherry Fly

With interest already being developed in a campaign to rid the valley of the cherry fruit fly the coming season, local canners call attention to a circular on control methods just being issued by the state college.

The circular was prepared by Ernest H. Wiegand, considered the best expert on the cherry fruit fly in regard to fighting the fruit fly. A portion of the circular has to do with dealing with the maggot after discovery which will be printed later. The portion relative to control methods which has to do with combating the fly in its earlier stages is as follows:

"Although we should practice destruction of cherry maggots in our plants, control of this pest is the essential thing. If a combined effort is made and the work kept up for a few years with proper spray for this insect can be controlled. Control must be united, however. If there is no effort made to wage a real battle in the commercial orchards as well as the local plantings, eradication or control can hardly be expected. Too many people who are small orchardists having only a few trees make no effort to keep these free of the pest. There must be a community interest established if the best results are to be obtained.

"The cherry fruit fly, like many other insects, passes the winter in the soil in a small reddish capsule like case. In the spring usually in June, they emerge in the form of adult flies. This is just the time the Royal Ann cherry is beginning to show color. This is from June 5 to 20. They are usually present in the orchard for about three weeks. During this time they feed on the droplets of moisture on the leaves and the honey-dew deposited on the foliage. After a period of a few days the egg laying begins. The flies sting the cherries with their sharp ovipositor and place the egg under-

ing professor of political economy in the Sheffield Scientific School in 1892-93 he served as dean of the Graduate School; in 1895-97 he was commissioner of Labor Statistics of the state of Connecticut and in this capacity published two reports that attracted wide attention and established his reputation as a statistician and as a student of the labor problem. From 1897 to 1909 he was associate editor of the Railroad Gazette of New York, having special charge of the department of foreign railroads.

As president of the university Mr. Hadley found it necessary to give up his regular courses of instruction but he delivered annually the masticulation and baccalaureate addresses. He also found time to prepare several courses of special lectures, such as the Kennedy lectures before the New York School of Philanthropy, the Yale lectures on the Responsibilities of Citizenship, and the lectures delivered at the University of Berlin in 1907-08.

President Hadley married Miss Helen Harrison Morris, daughter of the late Governor Luzon B. Morris, of New Haven, June 30, 1891. They had three children.

INDIAN HEAD IN STONE DUG UP WITH CLAY

Philadelphia (AP)—A stone believed to be a carving in granite of the profile of an Indian face has been unearthed near Oakford, Bucks county, in the Neshaminy valley, by Stanley Osborn, an amateur archeologist here.

The stone was found in a field imbedded in 18 inches of yellow clay, and when stripped of this revealed an Indian profile with sharp features. If the profile is the authentic work of an Indian craftsman, it is very probable that it has lain in this location for a period of more than a hundred years, Osborn said.

The forehead is pointed and the mouth and nose, while discernible, are somewhat narrow and crudely finished. This crudeness, Osborn said, might have been caused by the elements during the many years the stone was buried.

The carving has a notch behind the line of the forehead and another sharply cut out at the base of the neck. These cuts have led Osborn to believe that at one time the stone-face was attached to the head of a pole. Thus, in this position, Osborn said, when the sunlight was the strongest it would cast a profile essay if the rain washes off the spray.

"In applying the spray care must be used to see that no more material is used than is necessary. About one pint to one quart of solution per tree is sufficient. Apparently no greater control is found with the heavier applications and these may burn the foliage.

"In order that effective results are to be obtained in any program for the control of insects of this nature, the experiment station will cooperate to determine the exact time the fly shows up so that the various communities can be notified. This can be done through the papers, the county agents and the field departments of the canneries.

"It is further suggested that in case a program is started to control the fruit fly this coming season that the matter be taken up at once and progress worked out through the Northwest Canners Association and the extension department of the Oregon Agricultural college which will include every agency which might be of service in the furtherance of this very necessary program."

WINNIE LIGHTNER STARS AT CAPITOL

"She Couldn't Say No," a musical screen drama that is a distinct novelty, opens a three day engagement at Rich's Capitol starting Thursday. It is a Vitaphone production featuring Winnie Lightner, one of the most entertaining of the talking screen comedienne, who was starred in "The Goldiggers of Broadway."

Although the story of "She Couldn't Say No" is told in an atmosphere of night clubs, it isn't just a song and dance picture. There is comedy and song but there is also a note of tragedy and some highly dramatic scenes. The night club episodes are those showing Winnie Lightner in her role of a cheap club and later the toast of the town in the exclusive Kitty Kat.

Miss Lightner is indeed entertaining in these scenes when she is singing for the club patrons. She put her songs over with energy and humor and handles the dramatic scenes with a nice restraint.

Chester Morris is excellent in the role of the young racketeer who reforms under the guidance and love of Winnie and then breaks her heart by falling in love with a pretty society flapper, Sally Eilers. Tulvy Marshall and Johnny Arthur are the other principal members of the cast. They all give fine performances. Winnie Lightner is called the "Original Goldigger of Broadway." Several excellent Vitaphone shorts and the Movietone News and Leah Holt at the Ascending Wurlitzer will complete this fine program.

LODGE WORK GIVEN IN ESQUIRE RANGE

Dallas—Marmion lodge No. 96, Knights of Pythias, put five members through the ranks of esquire at the regular meeting Tuesday evening. They were John Sears, Riley Middleton, Loren Wilson, Lewis Rutledge, Claude Dunn, all of Dallas. Eight visitors from the Independence lodge No. 45 were guests at the meeting.

Indo-China is constructing many gold-mining projects.

A GLORIFIED CLEAR SKIN

A clear, smooth, lovely skin enhances personal attractiveness! More happiness and friends may depend upon it.

The way to it, rich in healthy blood, nourishes the body and aids in protecting it against infection and disease.

When you take S.S.S. to get rid of these outside blemishes you are building up the system to ward off gravel diseases.

S.S.S.

If you are one of the embarrassed—and are not excepted—with skin blemishes that linger, and sometimes leave scars, you will want to possess body power to clear up your skin.

S.S.S. will help Nature give you this power. Internal healthfulness will then reflect in your skin a natural loveliness—a skin glorified.

Millions of people have taken advantage of the wonderful medicine known as S.S.S. It gives to Nature what it needs to build you up so that your system may throw off the cause.

When your system is filled with rich, red blood, the body's power of resistance to infection and disease is raised. Your appetite should improve. Firm flesh should take the place of that which was once flabby. You should sleep soundly. You should feel strong. Your nerves become steady.

Take S.S.S. daily at mealtime. It promotes healthy body building. Seek energy, vitality and a clear skin through the great blood tonic which is made from strictly fresh vegetable drugs and has stood the test for over 100 years.

All good drug stores sell S.S.S. in two sizes. Ask for the larger size. It is more economical.

A Clear Skin Comes From Within

Just to Make Friends and Not to Make Money!

A thousand pieces of China and Glassware will be sold at ten cents apiece. Whole Dinner Sets will be sold for Nine Ninety Five a set... Enameled Clocks for the kitchen will be One Ninety Five, and many groups of Watches and Diamonds will be priced at half and in many cases less than half.

The Burnett Jewelry Store Puts On Its Seven League Boots to Make New Friends and to Bind Old Ones a Little Closer

Selling to start off at nine in the morning. No money is needed—none asked for—for Everybody (and His Wife) is welcome to Credit at the Burnett Jewelry Store.

BEGINNING at nine in the morning the Burnett Jewelry store will open its "Spring Drive" for new business. The plans laid months ago provide for a series of remarkable offerings. Foremost is a shipment of China—porcelain and glass. This comes from one of America's leading importers and includes Platters, Gravy Boats, Pitchers and Salad Bowls, Cups and Saucers and Plates in every wanted size. The values range from twenty five cents to two dollars and a half—all are to be sold for ten cents apiece. In the same group there's a thousand pieces of Glassware—Goblets, Sherberts, Wine, and last but not least, Salad Plates—these, too, are to be sold at a dime apiece.

IN ADDITION to the samples of China and Glass sets of, there will be entire Dinner sets in the famed "Willow Tree" pattern at Four Ninety Five a set—and last but not least—there are fifty beautiful, beautiful Imported Tea Sets—brought to this fair land to sell at ten to twenty dollars a set. These are to be sold (one set to a buyer, else Dealers would take them all) at Three Ninety Five a set! Incidentally, there are twenty three pieces in each set—Six Plates, Six Cups and Saucers, a Tea Pot, a Sugar Bowl and a Cream Pitcher.

MEN'S Watches in the new styles with fifteen jeweled movements and carrying the Burnett Guarantee (which means abounding satisfaction) will be sold for Fourteen Ninety Five. These look as well and perform as faithfully as the ones that are advertised to sell at double. Ladies' Bracelet Watches with FIFTEEN jeweled movements are to go at the same price (nobody, not even a watchmaker could tell them from the watches that sell for Thirty dollars.

ANOTHER group of Men's Watches has been selected from the lines that sell for Thirty Five to Forty dollars—these will be sold at Ninety Five—and all are watches with national reputations, though, of course, the names cannot be advertised. And Crowning the watch offers are Ladies' Bracelet Watches in White Gold filled cases that were made to sell at prices up to Sixty dollars—these may be had for Twenty Nine Fifty.

OF COURSE nobody needs to write a check for any one of these watches. The Burnett Budget Plan takes care of that. All that's needed is a half a dollar or so to "bind the bargain" as the old saying goes—and any watch in the sale is delivered to the buyer. The balance of the purchase price may be paid at the rate of a dollar or so a week.

ONE of the Big Surprises of this Friend-Making Event is the sale of "All-lectric" Clocks. These are in handsome Mahogany Cases which measure twenty inches along the base and stand about ten inches high. They are equipped with the "Elm City"

THE Burnett Store is one of a great chain reaching all the way from Port Angeles on the north to Hollywood on the South—in all there are now fifteen affiliated Burnett Stores on the Pacific Coast. In Salem the Burnett Store is located at 457 STATE STREET.

Your Frail, Puny Child Grows Strong Without Drugs

Now a very able chemist in New York is extracting Vitamins A and D from Vitamin tested Cod Liver Oil and putting them in unparagoned tablets known to doctors and pharmacists as the new and improved McCoy's Cod Liver Oil Extract Tablets.

Cod Liver Oil without the Vitamins, as you probably know, is useless—the Vitamins that build body frames, bones and teeth in frail boys and girls.

Two of these priceless tablets equal one teaspoonful of high grade Cod Liver Oil and for every ailment, rindown or underweight condition for which Cod Liver Oil is prescribed, McCoy's Cod Liver Oil Extract Tablets are just as good. If this was not true we would not be permitted to make this statement. Take your Vitamins straight—the sure way to get them—90 tablets, 60 cents, at all drugists.—adv.
