Writers Entertained At Picnic

Mr. and Mrs. J. C. Nelson entertained members of the Salem Arts League writers' section with a picnic supper Tuesday evening in the garden of the Nelson home on Wilson street. Supper was served on the lawn under the large trees, and the section meeting and informal program of original numbers was given later on the large veranda of the Nelson home.

The program was varied with poems, a feature story, the continuation of the reading of a short novel, and interesting talks. Mrs. Blanche Jones read two original poems, "April Hills," and "Tangled Threads." Original poems read by Miss Renaka Swart were titled "Questioning" and "Sunshine Creeping Through." Mrs. Edna Daily also contributed a group of poems, including those titled "Jumping Jack," "God's Wings," and "Safety."

Mrs. J. A. Jelderks read a feature story, "The Mystery House," descriptive of a California mansion. Perry Reigelman explained the technique of a short story course he is studying, describing a problem plot and its solution. He also told of a visit to Charles Lisle, former section member who is now confined in a local hospital. Mrs. J. C. Nelson told of the interesting correspondence which she and Mr. Nelson are having with a Portuguese family, and read some original Portuguese poetry.

The program closed with Mrs. William Fordyce Fargo reading the fourth installment of her novel, "White Soil." Mrs. J. M. Clifford, section leader, presided.

Section members and guests present for the evening were Miss Grace Gilliam, Mr. and Mrs. J. A. Jelderks, Mrs. Nellie Green of Portland, Dr. Mary Rowland, Prof. and Mrs. Morton E. White King's purity makes it safe for the most delicate colored fabrics, effective for the heaviest woollens, kind to the most tender hands. It's made from the same sort of fine vegetable and nut oils used in the manufacture of salad dressing. Fabrics, dishes, silver, glass, floors, woodwork—they're all easy for White King, even in hard or lukewarm water. Try White King Granulated Soap today. Its economy will surprise you. You need only use a teaspoonful in the wash basin, a cupful in the washing machine. It's condensed. Your grocer has it. *In the salt-water districts of Oregon and Washington, use less.

NEW INVENTIONS CROWD YEAR IN PICTURE WORLD

Hollywood (UPI)—Renowned as the world capital of the great motion picture art, Hollywood now has become the center of inventive genius. The authority for this is Dr. Lee A. DeForest, designer of basic radio and talking picture mechanisms, who finds that inventors from all parts of the globe have been drawn here by the audible screen miracle. The strenuous public demand for talking pictures superior to the first crude products was responsible for rapid developments in the last two years, according to Dr. DeForest. And this, incidentally, has led to Hollywood setting another world record.

"More than 300 invention covering phases of the talking picture were patented in the last two years," Dr. DeForest said. "This is perilously close to a world record for a single industry."

An "automatic volume control" similar to the radio device of the same name is one of the newest inventions. By placing the control on the film itself the volume is maintained at a constant pitch and fading eliminated, Dr. DeForest asserted.

Another ingenious attachment is a "silent splice" for patching broken film. Early talkies were marred by a jarring sound each time a splice passed through the projector, and as films wore out and patches increased, the noise became annoying. No more of that now.

Baso profundos and others whose voices delve into the lower registers found cause for rejoicing in a queer looking "baffle board" containing a microphone. Previously the technicians found trouble in capturing the lowest ranges, but this baffle

wood baffle board has solved the problem. Grace Moore used it to good effect in her new picture, "Jenny Lind."

"Talking picture paint" looks like ordinary paint but has a secret formula that keeps it soft and porous. Sound does not "bounce" or echo from it, but passes through the unseen holes in the paint.
