

BUTTER STRONG EGGS WEAKER POULTRY FIRM

Portland (UP)—General strengthening of the butter trade is reflected in not only the Pacific slope states, but in the country as a whole. Portland market is stronger. On the open market, conditions are very strong, in fact the strangle for supplies suggests that an advance in the price here is somewhat overdue.

Generally weak under and trade continues reflected in the market for eggs here with prices showing more of a loss among the outside buyers are burdensome although storage operations are gaining.

For the week-end there was practically no changes in the price of live poultry. Chickens showed a good demand for all sorts while turkeys fully held their own for heavy weights.

Country killed lamb market reflects liberal strength here with late price advances well maintained. Hogs are a trifle dull but unchanged in price. Veal is holding up fairly well.

Intense weakness is showing in the market for potatoes. Entire lack of speculative interest at primary points keeps the volume of business down. Many rollers congest the big consuming markets.

Limited offerings of hothouse tomatoes continue to arrive. Practically all the supply is from the Forest Grove section. Demand is far greater than supply.

While there remains little action, the market for wool has an increasing interest. Sales at big eastern markets are disappointing but there is a slight increase in advances on the coming crop.

ALFALFA GETS CLOSE STUDY

Independence—A number of alfalfa growers and other farmers gathered at the ranches of Ernest Ziesche and Ed Veith, in the Parker district, the first of the week for a demonstration on the sinner and feeding of alfalfa. These farmers have been experimenting with alfalfa for a number of years and have arrived at the conclusion that it is feasible both as silage and feed, for all kinds of stock. It was fed in the presence of the group of men to cattle, sheep, horses and chickens and all seemed to relish the food.

The farmers who have opened their silos and started feeding find that the further down in the silo they go the better it has been preserved. The difficulty heretofore has been in curing the crop and they recommended leaving the hay in the swath to wilt for 48 hours after cutting. They then put it into the silo without water.

Among the interested spectators were Frank Lewis, J. R. Beck, county agent, and other authorities on alfalfa.

Salem Markets

Compiled from reports of Salem dealers, for the guidance of Capital Journal readers. (Revised daily).

BUYERS' PRICES
Wheat, (contracted) No. 1 white 82c; red, sacked 80c bushel.
Feed oats 41c; corn, milling 42c; No. 2 40c; No. 3 38c; No. 4 36c; No. 5 34c; No. 6 32c; No. 7 30c; No. 8 28c; No. 9 26c; No. 10 24c; No. 11 22c; No. 12 20c; No. 13 18c; No. 14 16c; No. 15 14c; No. 16 12c;
