

WORLD EXPERTS PLAN STUDY OF DINOSAUR EGGS

Red Lodge, Mont. (AP)—A great congress of savants will gather here in the summer of 1932 to inspect the scene where ages ago a prehistoric dinosaur laid its eggs.

The eggs, or fragments of them, discovered last year by the Princeton University paleontologic expedition, have been heralded as one of the most important finds on the North American continent.

The first and only dinosaur eggs found previously were uncovered by the Roy Chapman Andrews expedition into the Gobi desert of northwestern China.

World scientists will be invited to attend the international congress of geologists, paleontologists and mineralogists.

Already plans are being made and an extensive guide to the richly laden Beartooth region near here is being prepared.

Dr. Francis A. Thompson, president of the Montana school of mines, has placed the facilities of his institution in cooperation with Princeton University in gathering data for the guide book.

Additional data on the region will be gathered this summer during the Princeton University summer school under the direction of Dr. W. T. Thomas.

Aside from its strata richly laden with fossil bones, its geologic peculiarities are thought to be unique in their similarity to classic Transvaal.

OIL GIVES TEXAS U. 9 BUILDINGS

Austin, Tex. (AP)—Nine new buildings to cost \$4,000,000, have been ordered erected by regents of the University of Texas.

Although the university has a permanent fund of \$17,500,000—accumulated largely by lease and royalty payments on oil-producing lands of the school, it has been restricted to use of the income from investment of the fund.

Chairman R. L. Batts testified recently that the regents estimate the permanent fund eventually will amount to \$20,000,000 by reason of oil royalty payments.

The new buildings for the university will be erected in the following order: library, boys' dormitory; student union building and cafeteria; physics, home economics, geology, architecture and engineering classroom buildings.

School Loses Pet Seal As Appetite For Fish Grows

Orange, Cal. (AP)—If Joe, pet seal, refuses to associate with his playmates in the rookeries of the Pacific this summer, it will be because of a feeling of superiority caused by a high school education.

Joe was captured and placed in a glass aquarium at Orange high school, where he was the object of mature lessons for a time.

A serious problem soon arose.

McMinnville INVITES YOU TO An Indian Pageant

From Col. J. C. Cooper's Novel

however, for Joe was a healthy young seal and needed his daily ration of fish. Fresh fish is not easily secured in Orange, especially in the quantities Joe demanded, so it was decided to release him.

At the beach he gleefully made for the open seas.

SCHOOL CENSUS DOUBLED Moscow (AP)—Fourteen million children were receiving public school education in 1930 and at least 2,000,000 more will be enrolled in 1931.

These figures were provided by Prof. Andrew Vihinsky, head of the State Scientific Council here. About 7,000,000 children were in schools before the revolution.

MURRAY VETCOE'S "HEIRS" BILL

Oklahoma City, (AP)—If Gov. W. H. "Alfalfa Bill" Murray's heir apparent, Lieut. Gov. Robert Burns, continues to perform his functions as being the "official apple sauce disher" he will have to use a radio, or dig down in his own pocket for cash.

Governor Murray has vetoed a \$250 appropriation for traveling expenses for the lieutenant governor. Shortly after Murray was elected,

he designated Burns, "the rightful heir apparent," as the "apple sauce disher" for the administration.

"I hereby appoint Burns to this high office, knowing the weighty problems of state will occupy my attention. I hereby notify all those wishing the services of an orator at dinners, banquets, funerals, and child christenings to call on my heir apparent. It's an old English custom," the governor said in a formal statement issued after the election.

The governor apparently has assumed many of the designated duties of the heir apparent. He will leave late in May for California for a vacation.

PHYSIOGNOMY KEY TO HUMAN SECRETS, CLAIM

Atlanta, Ga. (AP)—Intelligence tests are based upon unestablished theories, but in the examination of human physiognomy specialists finally will be able to ascertain the mental and moral characteristics of all human beings, Governor L. O. Hardman of Georgia, believes.

So convinced is he that a study of physiognomy, particularly of finger prints, will result in the definite determination of character and criminal tendencies that he has recommended legislation and the establishment of a special chair at the state university to study the subject.

For several years he has carried on correspondence and read reports dealing with his theory, and in that time has written scientists of Great Britain, France, Italy and Germany for their viewpoints.

Now the governor believes his theory has been proven correct. "I have had the finger prints of ten patients at the state insane asylum sent to an Ohio expert," he said.

"The reports definitely establish that there is a relation between the prints and the criminal, or insane characteristics of the patients."

"There must be definite relation between the loops and whorls of a person's fingertips and the corresponding cells of his brain, which are connected with his fingers over a nervous system. Physiologists, or alienists, allow their own feelings to influence pronouncements of mentality, according to the governor, but physiological records, once acquired under the law which he desires, would be for authentic

use wherever the individual examined came into later contact with the law.

As an example of inaccuracy in describing character, the governor declared that citizens from a Georgia county, gave positive and reliable testimony that a certain man could not have committed a series of criminal attacks in Atlanta. Yet four women positively identified him as their attacker, and it was necessary to allow the electric chair to take its victim. The man had already been convicted.

"An examination of his physical characteristics by one who knew how to interpret, would prevent any doubt about his possession or lack of criminal tendencies," Governor Hardman said.

Now retiring as governor, he has led a busy life as a physician in a northeast Georgia farming section. For decades he practiced medicine and carried on numerous business enterprises. Late in life he was elected governor of the state and has held that office for four years.

Georgia took a decided step in the psychological examination of criminals during the past year when the Bradberry brothers, two rural youths were saved from execution for murder, by a psychological examination.

At the time Dr. A. S. Edwards, head of the University of Georgia, department of psychology, visited the boys in jail and declared that they possessed child-like mentalities which kept them from being responsible for their crime. The two killed an aged negro couple.

TEXAS PECANS FOR KING

Austin, Tex. (AP)—Texas pecan trees will be planted in the grounds of King Boris' summer home in Bulgaria. Mrs. Louise de Roques, of Washington has ordered 100 trees sent the Bulgarian monarch as a gift. The Ramsey nursery here which filled the order last year sent 110 pecan trees to Natal in South Africa.

U. S. REVISES MEXICAN FRUIT SHIPPING RULES

Washington (AP)—Revised regulations covering shipment of Mexican citrus fruits in bond through the United States have been issued by the United States department of agriculture.

This is the first general revision which has been made since the circular instructions of February, 1929, but during the interim some administrative methods have been changed in consonance with the general purpose of the regulations, which is to prevent entry of the Mexican fruit fly (Tropica ludens).

The rigid control of fruit shipments from Mexico across United States territory is explained by officials here as due to the profound economic consequences which result from the fruit fly infestation.

A three year campaign has been waged by the United States department of agriculture against fruit fly infestation in the lower Rio Grande valley region with successful results.

The chief changes in the new regulations relate to the transshipment of Mexican oranges at New York, and to the routing of citrus fruits shipped from the state of Sonora in bond across the United States to Canada.

The new regulation regarding transshipment at New York, which extends the period when such transfer is permissible, reads textually as follows:

"In addition to the rail movement from the Mexican border ports of citrus fruit produced in the state of Sonora, Mexico, under the condi-

tions set forth above, citrus fruit from any part of Mexico coming to the port of New York or other approved northern Atlantic ports by ocean transit during the period November 15 to March 15, if apparently free from infestation, as determined by inspection at the approved port of entry, may be permitted entry at such ports for immediate transportation and exportation in bond to Canada in accordance with section 7 of the rules and regulations promulgated by the secretary of agriculture.

"A separate permit is required for each shipment of this character and application should be made in advance. However, if all required information is not available in advance of shipment, the forwarding agent at New York may file an application at the New York office of the plant quarantine and control administration at 45 Broadway, on the arrival of the shipment at that port.

"After the shipment has reached destination and been discharged either in Canada or Mexico, the car conveying it, as a condition of return to the United States, must be carefully swept and freed from all boxes, fruit or other rubbish by the railroad company involved."

Electric Sign Used For Burglar Alarm

Boston (AP)—Costas Mavrellis, dog dispenser, has discovered that the electric sign over his little South End shop is valuable not only for advertising purposes but as a burglar alarm.

When rowdies attacked him in his shop he switched the electric sign on and off repeatedly until he attracted the attention of Police-
man Martin J. Coleman. The officer appeared at the shop a few moments later and the assailants fled.

Fashion Day! Everything in Apparel at Summer Sale Savings!

WARD'S SUMMER SALE

Ask About Our New Service Convenience

Voile and Batiste Smart Tub-Fast Print Designs in Loveliest Pastel Colors 5 YARDS \$1.00

Bargain Percale Prints and Plain Colors Specially Priced in the Sale YARD 10c

Patterns and colors for most any need. Full 36 inches wide. Stock up now!
