Young babies, especially during the warm weather, are particularly susceptible to digestive upsets and diarrhoeal diseases. It is much easier to prevent these than to cure them. Clean cow's milk is the best substitute for mother's milk. It should be boiled for two or three minutes, then cooled before feeding it to the baby.

When cow's milk of good quality can not be obtained unsweetened or evaporated condensed milk diluted with water makes a satisfactory substitute. The best sweetened condensed milk is not recommended. Babies fed on it exclusively are fat, often look well, but have no resistance to disease.

Babies should be carefully protected from contact with other children and older persons in the family who are suffering with diarrhoea. House flies frequently carry the germs that cause diarrhoeal diseases, from out-houses to the baby's food or to the baby's hands, face and body. Houses should be screened in the summer and flies should be kept away from the baby, its food and clothing. The baby and young child should be dressed according to the temperature and not according to the season. Babies should rarely be fed more often than every three hours. There is less risk, especially in hot weather, if they are fed in four-hour intervals—that is, five or at most six times in the twenty-four hours. Cooled boiled water should be offered to the baby between feedings in hot weather.

The baby should have a room to himself. It should be clean, well ventilated and free from unnecessary hangings and furniture. Sunlight and fresh air are indispensable for the baby. The only safe procedure in raising babies is to consult a well-qualified physician for advice.

Tragedy, which for some time has been stalking the Theodore Isaak family of Woodburn, struck hard during the week-end and Monday, when his wife, Mrs. Isaak, who has been in jail, was released to attend the funeral of his wife, which will be held Tuesday.

There is less risk, especially in hot weather, if they are fed in four-hour intervals—that is, five or at most six times in the twenty-four hours. Cooled boiled water should be offered to the baby between feedings in hot weather.

The baby should have a room to himself. It should be clean, well ventilated and free from unnecessary hangings and furniture. Sunlight and fresh air are indispensable for the baby. The only safe procedure in raising babies is to consult a well-qualified physician for advice.

Tragedy, which for some time has been stalking the Theodore Isaak family of Woodburn, struck hard during the week-end and Monday, when his wife, Mrs. Isaak, who has been in jail, was released to attend the funeral of his wife, which will be held Tuesday.

Mrs. Isaak had been suffering from tuberculosis. There was trouble in the family, and a charge of non-support of the wife and their child was filed in justice court against Isaak. He was taken to jail Monday, but death halted the case.

The mother of Mrs. Isaak appeared before Justice of the Peace Hayden Monday. She was to be a witness. She informed the court that her daughter had died Sunday night and that she didn't want to appear in court just now. Isaak's request that he be freed to attend the funeral was granted.

Woodburn—Quite a sensation was created here Saturday night when Louis Ruszka, Woodburn's new chief of police, consistent with his promise to enforce the law regardless of where it might strike, arrested and jailed Constable W. C. Miller on a charge of being drunk and disorderly.

Ruszka, who is a former member of the Royal Canadian Mounted police, was in a pool hall when Miller came in. As the story goes, Miller called Ruszka a foreigner. Ruszka called Deputy Police John Muir and they took Miller to the city jail where he remained until about 2:30 o'clock Sunday morning. At that hour he was released on his own recognizance on order of the city recorder in the capacity of police judge. Miller appeared Monday morning and asked for further time in which to enter a plea. He was given until Thursday morning.

Ruszka was recently appointed chief of police to succeed Theodore Nehl who resigned.

Aged Portlander Killed by Vehicle

Portland, Ore. (UP)—A speeding automobile struck and killed August Chase, 78, as he was walking on a highway near his home here Monday. Chase was walking with another man when struck by an automobile driven by William E. Yung. He was hurled about 30 feet and killed almost instantly. Witnesses said Chase stepped in front of the machine. No charge was filed against Yung.

DISEASE GROWS

Communicable disease in Oregon for week ended June 13 totaled 239, an increase of 15 cases over the preceding week. The number of measles cases took a drop, however. The state health report showed 47 cases of this disease, as compared to 64 for the week ended June 6.

relative to aliens, is defendant in another filed Monday, charging that he used indecent and obscene language on a public highway. The complaining witness is said to be his wife. He was to appear Monday afternoon.

Ed. Cowden, said to be from Hollywood, Cal., was sentenced in justice court Monday to 15 days in jail for fishing without a license, but was paroled. He said he was up against it and was fishing to get something to eat.

Young babies, especially during the warm weather, are particularly susceptible to digestive upsets and diarrhoeal diseases. It is much easier to prevent these than to cure them. Clean cow's milk is the best substitute for mother's milk. It should be boiled for two or three minutes, then cooled before feeding it to the baby.

When cow's milk of good quality can not be obtained unsweetened or evaporated condensed milk diluted with water makes a satisfactory substitute. The best sweetened condensed milk is not recommended. Babies fed on it exclusively are fat, often look well, but have no resistance to disease.

Babies should be carefully protected from contact with other children and older persons in the family who are suffering with diarrhoea. House flies frequently carry the germs that cause diarrhoeal diseases, from out-houses to the baby's food or to the baby's hands, face and body. Houses should be screened in the summer and flies should be kept away from the baby, its food and clothing. The baby and young child should be dressed according to the temperature and not according to the season. Babies should rarely be fed more often than every three hours. There is less risk, especially in hot weather, if they are fed in four-hour intervals—that is, five or at most six times in the twenty-four hours. Cooled boiled water should be offered to the baby between feedings in hot weather.
