

### GREGORY VETO EXPECTED ON GARBAGE BILL

With eight affirmative votes the city council Monday night approved an ordinance bill granting to the Sanitary Service company an exclusive franchise to haul garbage on the streets of Salem, and providing that the company shall operate the municipal incinerator without cost to the city.

There is apparently no doubt that Mayor Gregory will veto the bill. In a talk from the chair Monday night he opposed it emphatically, and, besides voicing his objections to the principal of the bill declared his belief that the city charter inhibits the granting of exclusive franchises. It was also opposed on the floor by Alderman Needham, who said he could see no reason for rejecting a previous proposal that was similar except that the concern making the proposal offered to pay the city \$2,000 a year for the privilege of operating the incinerator.

"I understand," said Needham, "that the incinerator cost the city \$40,000. The \$2,000 a year offered by the other concern would be 5 per cent on that investment. I can see no reason for presenting another concern, under this ordinance, a \$40,000 investment with no return to the city."

Alderman Kuhn replied that the chief merit of the bill was that it would relieve the city of the expense in excess of \$6,000 a year in operating the plant.

Before going to a vote the bill was amended in committee of the whole to provide that the franchise could not transfer to anyone else without approval of the city council.

The approved ordinance reserves to the city the right to fix rates to be charged by the company for the collection and hauling of garbage, and fixes a schedule of rates to be charged at the start. These are practically the same as those charged at the present time by the two concerns that under the ordinance became merged into one concern.

The bill requires that the company shall give a surety bond of \$10,000 to guarantee faithful performance of the terms of the franchise.

The franchise dates from the effective date of the ordinance. The city has the right to cancel the franchise at any time it is determined that its terms have been violated by the company.

### Second \$3 Bill of Kind in U. S. Found

Madison, Wis., (AP)—A \$3 bill has been found in Madison to disprove reports that "the world's only three-dollar bank note" had been discovered in the possession of Clem Ivey, Cincinnati.

Ben R. Boorman is the owner of the bill found in Madison. It was issued by the State bank of Mount Vernon, Ind., in 1858, and has been in Boorman's possession for many years.

Ivey's note is dated June 21, 1841, and was issued by a Lebanon, O., bank under authority of the state of Ohio.

London (AP)—Horace Luck, 80, one of the last postmen who blew a bugle when delivering letters, is dead.

### ALBERT FALL CONVICT 6991

Former Member of President's Cabinet Committed to Prison

Santa Fe, N. M., (AP)—Albert B. Fall Tuesday became number 6991 in the New Mexico state penitentiary—stripped of his citizenship rights in the state which heaped honors upon him.

The 70-year-old former secretary of the interior was committed Monday night to serve a sentence of a year and a day for taking \$100,000 to negotiate a lease on federal oil naval reserve while he was a cabinet member.

The commitment marked the end of an eight year legal battle which eventually reached the highest court of the land and was carried to the president of the nation.

Boostered by two heart stimulants, Fall was immediately taken to the hospital. Dr. J. H. Gambrell, his personal physician, said Fall was in "no condition to be confined."

Some speculation was aroused concerning an act within a few minutes after Fall was committed to the prison. Washington, D. C., officials were notified of the commitment. Since numerous appeals have been made to the president to pardon Fall, and since a pardon is not granted until a prisoner is committed, there was a belief current here among those close to the case that the notification of his commitment indicated some quick action looking to a pardon.

Fall left El Paso Saturday afternoon and went to his Tres Rios ranch. He stayed there two days and Monday afternoon began the 327 mile trip to the prison here. Fall was transported in an ambulance.

In his only talk with newspapermen, shortly before the party reached Santa Fe, Fall told the reporters he felt weak.

Newspermen were barred from interviewing Fall once inside the prison. None of the members of Fall's family entered the prison with him.

Dr. E. W. Fleke, prison physician, was to examine Fall Tuesday to determine if he is able to undergo fingerprinting, photographing and other prison routine, including outfitting him with prison denim and cutting his hair.

### WAR MADE ON CURB CUTTERS BY ALDERMAN

War was declared in the city council session Monday night against motor vehicle service stations or any other persons or concerns who take away public parking space by cutting away street curbing in the construction of driveways.

This was started by Alderman Townsend, and, on his motion, City Attorney Trindle was introduced to draft an ordinance providing that this privilege shall be exercised only on a permit issued by the council, and that the permit shall provide for a fee and penalty.

Townsend called attention to the fact that at the present time this space is taken by anyone desiring it without permission from any authority, and that in the case of the large service stations parking space is taken away from the public and utilized for driveways for a distance of about a quarter of a block, on two streets if the station happens to be on a corner, which it invariably is. Townsend declared that the merchants of the city are complaining about the condition for the reason that it prevents patrons of the stores from parking their cars in the business district.

The motion was objected to by Alderman Paul Hendricks who said he would be agreeable to applying it only in the business district, but that it would be silly business to apply it all over the city. "If every person who wants to build a driveway into his garage has to get a permit from the council to cut the curb," Hendricks said, "we will have a flood of applications at every meeting of the council."

Townsend's stand in favor of a fee for the privilege of cutting curbs was one way, he said, in which the city might raise a considerable amount of money each year otherwise than by property taxation, and he made a motion, which was carried, for a special committee to make a study of possible sources of revenue. Mayor Gregory appointed Townsend, Olson and Evans on the committee.

### CHINA FAVORING LOVE MATCHES

Peiping (AP)—Three of the highest officials in China, General Chiang Kai-shek, Marshal Chang Hsueh-liang, and H. H. Kung, Minister of Industry, have given great impetus to the movement for "love matches" in China.

The Chinese press recently reported that General Chiang had "arranged" a marriage between the eldest daughter of Marshal Chang, who is 14, and the eldest son of Kung.

But Chu Kwang-mu, Marshal Chang's chief secretary, explains that the press report is not true. He said that Marshal Chang and Kung both believe in "love matches," and did not arrange a marriage between the young people.

It is true, however, Chu declared, that General Chiang suggested that such a marriage would be a happy one, and that Marshal Chang's daughter was introduced to Kung's son during the Marshal's recent trip to Nanking.

This official version of the incident has encouraged youthful reformers, who are fighting the old system of arranging marriages "sight unseen" in China.

RUSS GIRL WINS HONORS Blue Mountain, Miss (AP)—Lulla Mowgovy, Harbin, Manchuria, is the first Russian girl to graduate from Blue Mountain university. She completed her course in three regular sessions and despite her heavy schedule was able to participate in numerous extra-curricular activities. She received the B. A. degree.

Nearly 11 percent of the textile trade-union members of Germany are unemployed.

### Queer Waterspot Hums Like Airplane

Seattle (AP)—Pedestrians stopped and looked upward, golfers hesitated in their play, workmen put down their tools momentarily when a musical humming, persisted, and then spectators saw what was generally said to have been one of the most peculiar sights ever seen in the skies hereabouts.

A queer cloud, appearing like an "aerial waterspot," descended upon a darker cloud below until the point of the cone seemed to enter the dark cloud and draw its sustenance from its interior. The spiral grew larger, while the black cloud diminished in size. Then the cone rose until it disappeared in a heavy bank of clouds. The humming sound ended with its disappearance.

Observers were unable to tell exactly what it was, but believed it was in the nature of a cyclone.

POWER PLANTS GAIN Stockholm (AP)—Sweden now has 1,335 water power stations against 738 in 1916. It has been brought out in a survey by the Royal Board of Trade. In 1929 these plants generated a total power of approximately 1,500,000 kilowatts.

## We Suspect the Glove's on the Wrong Hand this Time

Accordin' to an ad we saw the other day put out by a \$50,000 a year advertisain' man for oneatha chain trusts, he figures just about karrect, and we allow he should be put at the head of the class. That ad wasent worded just exactly like this but the meanin' was exactly the same. Now here's the way it sounded:

"Us boys are givin' you folks what comes in this store, good service because we gits a cut outa what we make and naturaly we like to have folks come in soe's we can work on 'e mand sell 'em a lotta stuff that isn't specials, because our boss said that the money is not made sellin' specials and us boys know that anyway. But the fellers in Wall street has to have somethin' to say because they're workin' in hand in glove weth us boys. That is, they don't actualy work like common folks do. What they do is sit in an office, figure out how to make a lotta money without workin' for it, and they said if our store sends i na lotta proffits they're gonna give us boys six bits for Christmas some time."

Moren likely we will get a letter from that advertisain' man thankin' us for puttin his ad in a language that is correct or—and right here's a good place to acknowledge the many flowery (or maybe it's floury) compliments we've been receivin' from everybody on the great improvement in our English and grammar.

We're kinda mixed up a bit as to which is English or which is grammar, but we won't deny that there's a big improvement in 'em both. Of course there are some folks that'l say the improvement has gone far enough. But as a feller told us onced, there are more and more people buyin' foods at the Market, not because the grammar is good but because they can save a little of their hard-earned money without watchin' every minit. And that's somethin' considerin' the depressi'n and everything.

## Busick's at the Market

Not a Chain Store

Nice weather we're havin', ain't it? A little hot but I guess it's the time of the year fer it. Hold on, don't read that. We musta been thinkin' about somethin' or other. We was gonna say that at the Market you'll find a lotta things that are very pleasant to take this kind of weather, such as fer instance watermellons, cantaloupes, fresh peaches, you know, a lot of things like young garden vegetables, lemons, oranges and iced tea and cold luncheon meats and salad dressings and such.

### FLOUR & FEED DEPT.
