

DALLAS TO VOTE ON PURCHASE OF WATER PLANT

COUNCILMEN OF CITY PLEDGED TO SAFEGUARD

Dallas—Whether or not the city will spend \$120,000 in the acquisition of the water system now owned by H. V. Gates, will be decided at a special election September 8. Arguments in favor of the purchase have been published in pamphlet form and are being distributed this week. Based on the 1930 population of 2,975 for Dallas, it is estimated that the annual earnings of the plant will be \$23,388 with operating expenses of \$4,460 each year.

Figures kept by Gates, and which were used as a basis in fixing the purchase price, have been sworn to and for the past three years show an average annual revenue of \$23,388 with general expenses of \$4,460 and a net of \$18,928.

In the 29 years operation of the Dallas water plant an increase in income has been recorded each year and it is estimated that gross receipts for this year will be \$24,000, indicating a profit of more than \$19,000. Serial bonds to be retired from the earnings of the plant will be issued if the bond issue is approved by the voters. The charter amendment, which authorizes the purchase of the plant, also provides that after the plant is paid for the surplus earnings shall be used for reduction of taxes by transfer to the general city fund.

Engineers who have investigated the Dallas water plant state that the present condition of the system is such that no major replacements will be necessary for many years and that the plant is the most cheaply operated and maintained in the state, showing the greatest earning power upon the investment.

Protection of the public is provided by the amendment which authorizes a water board of five substantial tax-payers and bona fide residents of Dallas, appointed by the mayor and confirmed by the council, serving terms of five years each, no members being permitted to hold a city office.

Lone Hopper Man Is Good Fireman

Hopmore—What might have been a very bad fire was prevented by Walter Lander, the only man in Hopmore at the time. Homer Gunley was preparing for the threshers and probably to prevent fire had piled a lot of rubbish and burned it near his barnyard gate on Sunset avenue. Thinking the fire was extinguished he left town. A wind from the north fanned it into flames, partly burning the gate. The barn and stubble field with its shocked grain, hophouse, and the Jones woods were in danger. Walter Lander saved the Shepherd home last winter and the little boy who hid under the bed because he had been forbidden to light matches.

"TOASTING" expels SHEEP-DIP BASE naturally

(Black, biting, harsh irritant chemicals)

present in every tobacco leaf

"They're out—so they can't be in!"

Every LUCKY STRIKE is made of the finest tobacco leaves the world can offer—the finest from Turkey—the finest from Kentucky, Tennessee, Virginia, Georgia, and the Carolinas—the Cream of many Crops throughout the world. But all tobacco leaves, regardless of price and kind, as nature produces them, contain harsh irritants. LUCKY STRIKE'S exclusive "TOASTING" Process—a process that mellows, that purifies, that includes the use of the modern Ultra Violet Ray—expels certain harsh irritants naturally present in every tobacco leaf. We sell these expelled irritants to manufacturers of chemical compounds, who use them as a base in making sheep-dip*, as well as a powerful spraying solution for fruits, flowers and shrubs—enough to permit the daily dipping of over 50,000 sheep or the daily spraying of many thousands of trees. Thus, you are sure these irritants, naturally present in all tobacco leaves, are not in your LUCKY STRIKE. "They're out—so they can't be in!" No wonder LUCKIES are always kind to your throat.

The finest tobacco quality plus throat protection.
