Best Remedy for Cough Is Easily Mixed at Home

You'll never know how quickly a stubborn cough due to a cold can be conquered, until you try this famous recipe. It is used in millions of homes, because it gives more prompt, positive relief than anything else. It's so simple at all to mix and costs but a trifle. Into a pint bottle, pour 2½ ounces of Pinex; then add plain granulated sugar syrup, strained honey to make a full pint. This saves two-thirds of the money usually spent for cough medicine, and gives you a purer, better remedy. It never spoils, and tastes good—children like it.

You can actually feel its penetrating, soothing action on the inflamed throat membranes. It is also absorbed into the blood, where it acts directly on the bronchial tubes. At the same time, it promptly loosens the germ-laden phlegm. This three-fold action explains why it brings such quick relief even in those severe coughs which follow cold epidemics.

Pinex is a highly concentrated compound of Norway Pine, containing the active agent of creosote, in a refined, palatable form, and known as one of the greatest medicinal agents for severe coughs and bronchial irritations. Do not accept a substitute for Pinex. It is guaranteed to give prompt relief or money refunded.
