As the accuracy of the hour-glass depends upon an even, continuous flow ...
a little at a time
... so the uniform flavor of Hills Bros. Coffee is produced by Controlled Roasting—the exclusive process that roasts evenly, continuously ... "a little at a time."

KEEP COOL WITH HILLS BROS COFFEE-iced TO A FROSTY GOODNESS

HERE'S one drink that never fails to freshen a thirsty throat ... to bolster you up and help you through a hard, hot day ... Hills Bros. Coffee, iced to a cheering, chilling goodness.

What relief and new life you find, as you drink it slowly—savoring each sip—making the most of that rich, exquisite flavor! For here is coffee at the height of flavor-perfection. Coffee with the taste that Nature intends—developed by perfect roasting! Lift a golden-brown, icy glass to your lips, and meet a taste and refreshment you never dreamed of. What a drink it is! For Hills Bros.' exclusive Controlled Roasting process roasts the coffee-berries to flavor-protection ... never under-roasts nor over-roasts.

Really, you haven't any idea how delightful iced coffee is, unless you've tasted Hills Bros. Order some today, by name, and look for the Arab trademark on the can.

HOW TO MAKE A MARVELOUS GLASS OF HILLS BROS COFFEE-iced

Prepare Hills Bros. Coffee in your regular way. Then instead of adding ice to the hot coffee, cool it in a pitcher or dish—and chill in your refrigerator. Do not add ice until ready to serve—for ice dilutes the delightful, bracing flavor. Serve with cream, if desired, and sweeten to taste.

The vacuum process of packing coffee is the only method that fully preserves coffee freshness—the air is removed from the can and kept out. It was originated by Hills Bros. over thirty years ago. (There is no magic about a vacuum can—it will not make poor coffee good, but it will keep good coffee fresh.) No can of Hills Bros. Coffee will ever "go stale." The vacuum can keeps it **FRESH ALWAYS!**
