

FRANCE AND BRITAIN SIGN PACT

NEW BILL TO PAY OFF VETS BEFORE HOUSE

Bonus Army Marches To
Capitol To See Final
Effort Made

Measure Estimated To
Cost Billion—Provides
Only for Needy

Washington, July 13 (AP)—While several thousand veterans clustered about the capitol a new bill was brought forward today calling for immediate payment of the bonus to those in need.

The measure was prepared by Representative Patman (D., Texas) and patterned along the lines of a petition presented yesterday by a group of bonus marchers from California.

Patman estimated it would require a billion dollars. The provisions by which the need of the veterans would be ascertained would be laid down by the veterans bureau.

Washington, July 13 (AP)—Ten thousand war veterans rose soon after dawn today and started a march for the capitol from their Anacostia camp on the District of Columbia outskirts.

Police reported that the men, in Washington for several weeks seeking immediate cash payment of their bonus certificates, were orderly.

No interference was planned by (Concluded on page 8, column 6)

MIDDLE WEST SUFFERS HEAT

Chicago, July 13 (AP)—Soaring temperatures today menaced heat records for this date in Chicago and the midcontinent area to the south.

The weather forecaster predicted the Mercury would go to 95 in Chicago, which would equal the all time record for July 13, established in 1880, and said it might go higher.

A hot wind from the southwest abetted a boiling sun in bringing discomfort. Thousands flocked to beaches and parks.

Relief was promised for tonight or tomorrow, when thunder showers are expected to accompany a shift in the wind. By tomorrow, the forecaster said, winds should be sweeping down from the lakes, bringing decidedly cooler weather.

A high barometric pressure area to the north already has sharply reduced temperatures in the Dakotas and the weather is getting cooler in northern Wisconsin and northern Michigan. From Chicago southward, however, the hottest weather of the year was in prospect.

At 10 a. m., the thermometer read 85 in Chicago and the mercury was rising rapidly. It remained in or near the 80s most of the night, dropping at 7 a. m. to 74, and leaping upward thereafter. The highest reading in Chicago yesterday was 88 degrees at 5 p. m.—an increase in nine hours of 24 degrees.

ARMED REVOLT IN ECUADOR STARTS

Guayaquil, Ecuador, July 13 (AP)—An armed revolt against the government broke out in Ecuador today. At Loja, General Cordova rebelled with his battalion and proclaimed Colonel Luis Larrea Alba dictator. Colonel Aguilino Vascones, chief of the military zone of Cuenca left there today for Loja, to put down the movement.

In Quito, Colonel Larrea Alba, alleged leader of the movement; Commander Bolivar Valdivieso Alba and other officers were arrested. The movement apparently had no repercussions in other places.

Larrea Alba formerly was acting president of the republic.

Ringling Laughs At Amputation Story

New York, July 13 (AP)—John Ringling, chuckling, denies a report that he hasn't got a leg to stand on. The magnate of the big top, recovering from an infection of the foot, issued a statement from his Coney Island hotel suite, contradicting a report that his legs had been amputated.

"I just came in from the boardwalk and I wasn't walking on my hands, either," he said.

Good Evening!

Sips for Supper
By DON UPHOHN

A biography of R. R. Imbler in the Dallas Itemizer-Observer says that Mr. Imbler was not only head of the Kiwanis club over there but also was "millet" in the chamber of commerce in 1928 and 1929. Now there's an idea. Every chamber of commerce and service club should have a "millet." The depression has cut out a lot of this glad handling and the good old days should come back again.

THE HIGH BROW JANITOR
Incidentally the state college we see in starting to practice some rigid economies. As note the following item today in the Statesman from Selo:

"Ten million years ago, what is now Oregon was nothing more than two large islands intersected by a huge bay," stated Fred Renter, janitor at Oregon State college, in a short descriptive talk given Saturday at the fossil beds near Selo. "We don't know anyone better equipped to talk about old fossils than the janitor at the state college."

Cliff Parker appeared downtown with a handsome shiner and we were informed that Cliff was not it when he pecked through a keyhole last night and just in the midst of his pecking somebody opened the door suddenly. He was lucky it wasn't a hatpin.

It must have been a great day in the life of Rod Alden yesterday, receiving editorial mention in the Capital Journal. He used to have to be satisfied with mention in our column now and then. We suppose hereafter he'll turn and scorn the base degrees by which he did ascend.

Divorces dropped off 21 per cent in Oregon the first six months of the year.

It shows that people can hold out longer on only love and kisses than when there's plenty of dough.

It appears now that all which makes this generation different from that of 50 years ago is the gasoline supply. If that would suddenly dwindle out we'd be right back in the shape of our good old ancestors, except the country would be short on horses.

N. J. Bowers, West Salem market gardener, reports he's killing his carwigs by scalding them to death with boiling water from a teakettle. Same is effective except that a lot of folks would have to buy teakettles by the gross and also would have to scald phone books, rugs, and picture frames as well as the pockets of their clothes every morning before dressing.

The republicans have started looking up the records of Messrs. Roosevelt and Garner. That's where the democrats have a head start. The record of Mister Hoover shouts for itself.

CENSORSHIP UPON BRAZILIAN WIRES

New York, July 13 (AP)—The all-American Cable company announced today it had been notified by the Brazilian government that communication to and from all points in the state of Sao Paulo, center of the Brazilian revolt, had been suspended.

Telegrams from all other parts of Brazil, including Rio de Janeiro, must, until further notice, be written in plain language with the exception of messages for the government and the Bank of Brazil.

Crushed and Fearful Libby Reynolds Reaches Parents Home In Ohio

Cincinnati, Ohio, July 13 (AP)—Libby Holman came home today to seek sanctuary behind what cloak of privacy her family could throw about her. Hurrying from a train

that reached home today. There was no smiling and bowing to those who had seen her grow in precocious youth, and seen her professional debut on the stage. Instead, there was just a glimpse of a heavily cloaked girl, face covered, head lowered, as her lawyer-father half pushed, half carried her from the steps of the railway car to an automobile across the rural station platform, and then a quick succession of relatives—mother, brother, sister—scurrying from the train to car.

Libby and her family left Winston-Salem last night, deserting the Reynolds estate, seat of the fatal

It was a crushed and fearful Libby

HOUSE PASSES RELIEF BILL ON HOOVER LINES

Adopts Amendment Requiring Publicity for Reconstruction Loans

Differs From Senate Bill By Striking Out Federal Reserve Loans

Washington, July 13 (AP)—The house today passed the \$2,122,000,000 bill, drafted along lines approved by President Hoover.

A few minutes before passage, Speaker Garner cast the deciding vote and broke a tie on the Rainey amendment to force the reconstruction finance corporation to file monthly reports on all loans made under the new relief bill. He voted for the amendment.

The roll call vote on the Rainey amendment before the speaker cast his ballot was 169 to 168.

Representative Snell of New York, minority leader, demanded a recapitulation of the vote. It was the same.

In passing its own relief measure, the house thrust aside the senate's relief bill, passed last night, because of President Hoover's objection to some phases.

The record vote on passage of the bill was 296 to 46.

The chief difference between it and the one vetoed Monday by President Hoover is that it lacks the provision permitting the reconstruction corporation to lend to individuals.

In an amended complaint filed in April, 1931, it was alleged that the haulers had paid the regular license fees, which, together with the gasoline taxes paid, were sufficient to compensate the state for their share of highway maintenance and police regulation, that the additional license fees were unjust, and demanding that the secretary of state be enjoined from collecting them.

A temporary restraining order was granted March 17, 1930. The state demurred to the complaint and the case went up on appeal and the law was upheld by the state supreme court.

In the meantime the additional license fees went uncollected, and now amount to around \$75,000. (Concluded on page 8, column 4)

JAPS INTERFERING WITH RAILROADS

Moscow, July 13 (AP)—A dispatch from Khabarovsk published here today said the Japanese had failed to fulfill their promise not to interfere with the operation of the Chinese Eastern railway in Manchuria.

The dispatch said that the railway's harbor on the Sungari river at Harbin was seized on July 7 by a group of Manchurian local police commanded by a Japanese advisor representing the staff of the Manchurian river fleet.

The action, the dispatch charged, was prompted by a Japanese desire to lease the harbor to a Japanese transportation firm which is a branch of the South Manchurian railway and thus to divert traffic to that road, which is controlled by the Japanese, at the expense of the Chinese Eastern.

BAKER GOLD MINE SOLD FOR OPERATION

Baker, Ore., July 13 (AP)—Purchase of the Bull Run gold property near Unity fifty miles south-east of here was announced today by Miles D. Rambaugh and associates of Los Angeles. A fifty-ton mill has been shipped here from Los Angeles and was being taken to the mine today for installation.

GETZ DISAPPEARS TO DODGE PROBE

Portland, July 13 (AP)—Investigation into the Zorn MacPherson petition theft "hoax" was at a stalemate today with no progress reported by authorities in their search for E. L. Getz, wanted as a witness in the removal of 20,000 signatures to the college merger initiative.

Authorities have not named the only known members of the trio that conspired with Robert Tallman, watchman at the Zorn bill headquarters, to make the taking of the petitions appear as a holdup, and thus have been unable to do so.

It was stated Getz was not at his home or place of business in Corvallis.

Puppy Saved Little Owner Happy Now

New York, July 13 (AP)—Little Lucy Graux, just 11, walked into the hospital for the ruptured and crippled carrying in her arms a little white puppy-dog.

"This is Trislie," she told Dr. Edward Barnett, "and her leg is broken, and the dog-doctor said he would have to kill her; but I don't want him to kill her because she is the nicest dog in the world, and so I brought her to your hospital."

Dr. Barnett called in three other doctors. This was no simple case. It called for consultation. X-rays were made. The doctors pondered. Finally they laid Trislie on the operating table, put her to sleep (Concluded on page 8, column 6)

TRUCKMEN SHY \$73,000 FEES

It became known today that Secretary of State Hoos has placed into the hands of Attorney General Van Winkle for collection about \$73,000 in license fee bills which truck operators of the state are refusing to pay.

The refusal by the operators is notwithstanding a supreme court opinion upholding the law which the truck men attacked in court.

In July, 1930, the Portland Van & Storage company and about 32 other haulers, as anywhere-for-hire trucks filed a complaint in the Marion county circuit court attacking the constitutionality of the state law imposing additional license fees on motor vehicles operating as contract haulers.

In an amended complaint filed in April, 1931, it was alleged that the haulers had paid the regular license fees, which, together with the gasoline taxes paid, were sufficient to compensate the state for their share of highway maintenance and police regulation, that the additional license fees were unjust, and demanding that the secretary of state be enjoined from collecting them.

A temporary restraining order was granted March 17, 1930. The state demurred to the complaint and the case went up on appeal and the law was upheld by the state supreme court.

In the meantime the additional license fees went uncollected, and now amount to around \$75,000. (Concluded on page 8, column 4)

SENATE REFUSES LAUSANNE PROBE

Washington, July 13 (AP)—The McCellar resolution to ask President Hoover as to this government's activity in negotiations connected with the Lausanne reparations agreement was rejected today by the senate foreign relations committee, 8 to 4.

The resolution was introduced yesterday by Senator McCellar (D., Tenn.) after the senate had received a denial from Secretary Stimson that this government was party to the so-called "gentlemen's agreement" reported to condition the Lausanne reparations settlement on revision of the debts due the United States.

The committee's action today was interpreted by members of the group as putting an end to the dispute so far as the senate is concerned.

FRANCE PLANNING TO INCREASE TARIFFS

Paris, July 13 (AP)—New tariffs on importation of fresh fruit which would seriously damage the United States export trade with France, valued at \$10,000,000 a year, were being considered today by the ministry of agriculture.

The official journal announced import quotas on fruit, established for July, do not allow a quota to the United States, as the United States does not export fruit in July. However, it was explained the quota is merely a temporary measure to restrain imports until a higher fruit tariff can be passed by parliament.

NEW HEAT RECORD LOWER MICHIGAN

Detroit, July 13 (AP)—New heat records for 1932 were established today in most of the lower Michigan peninsula, while crowds sought relief at beaches and resorts.

Several prostrations were reported, and one death, that of Benton Penn, 58-year-old farmer living near Coldwater.

AMELIA WINS CROSS NATION FLIGHT MARK

Aviatrix Lands At Newark In 19 Hours 14 Minutes Lapsed Time

Forced To Land At Columbus Because of Fuel Trouble

Newark, N. J., July 12 (AP)—Amelia Earhart Putnam landed here at 11:28 a. m. E.S.T., establishing a new women's transcontinental flight record.

Mrs. Putnam beat the time of Miss Ruth Nichols, the previous record holder, by almost ten hours. Miss Nichols, who made one stop between west and east coasts, at Wichita, Kansas, had an elapsed time of 29 hours, one minute and 43 seconds.

Mrs. Putnam stopped once also, at Columbus, Ohio, and her elapsed time was 19 hours 14 minutes and 40 seconds, according to figures available prior to publication of the official landing time.

Mrs. Putnam intended, when she took off from Los Angeles yesterday, to make the first non-stop flight by a woman from coast to coast and to try to beat the non-stop flight record established by Frank Hawks five years ago. This record is 17 hours 38 minutes and 59 seconds.

A forced landing at Columbus, caused by fuel feed trouble, however, put her out of the running for this record and left her with only the Nichols time to beat. Miss Nichols did not attempt to push along after she landed at Wichita, but spent the night there. Mrs. Putnam stayed in (Concluded on page 8, column 6)

ST. LAWRENCE TREATY READY

Washington, July 13 (AP)—White House officials announced today that a treaty had been agreed upon with Canada for completion of the huge St. Lawrence waterway project and it would be signed by President Hoover at an early date.

A statement made public at the executive mansion said at the present time only the outline of the treaty was completed, but the wording was in process of construction.

It was stated that when the president signs, full statements concerning the end in view would be made by both the United States and Canada.

The announcement followed only a few days after a telegram from Governor Roosevelt, the democratic presidential nominee, suggesting to President Hoover they consult in an effort to place a treaty before the senate.

The president replied that treaty progress was satisfactory and no conference was necessary.

SENATE REFUSES LAUSANNE PROBE

Washington, July 13 (AP)—The McCellar resolution to ask President Hoover as to this government's activity in negotiations connected with the Lausanne reparations agreement was rejected today by the senate foreign relations committee, 8 to 4.

The resolution was introduced yesterday by Senator McCellar (D., Tenn.) after the senate had received a denial from Secretary Stimson that this government was party to the so-called "gentlemen's agreement" reported to condition the Lausanne reparations settlement on revision of the debts due the United States.

The committee's action today was interpreted by members of the group as putting an end to the dispute so far as the senate is concerned.

FRANCE PLANNING TO INCREASE TARIFFS

Paris, July 13 (AP)—New tariffs on importation of fresh fruit which would seriously damage the United States export trade with France, valued at \$10,000,000 a year, were being considered today by the ministry of agriculture.

The official journal announced import quotas on fruit, established for July, do not allow a quota to the United States, as the United States does not export fruit in July. However, it was explained the quota is merely a temporary measure to restrain imports until a higher fruit tariff can be passed by parliament.

Change In Charter Fails In Purpose To Relieve Budget

Whether the city council in submitting to the people at last May's election an amendment to the charter provision authorizing the levy of a special continuing tax of not to exceed 2 mills for fire department purposes accomplished what was in mind seems very doubtful as the budget committee prepares to roll up its sleeves and tackle the preparation of the budget for 1933.

What the council, or some of its members had in mind in submitting the amendment which was approved by a majority vote of the people was to secure authority to utilize funds derived from the 2 mill levy in the payment of salaries of the fire department, thus relieving the general budget of a portion of this major item of city expense. The original charter amendment authorizing the levy, which was enacted by the people in 1926, provided that the money raised by the tax could only be used for buildings and equipment.

Under the limitations imposed by the six per cent tax increase provision of the state constitution the matter of the state constitution. (Concluded on page 9, column 6)

CRUISE ENJOYED BY ROOSEVELT

With Governor Roosevelt, Stonington, Conn., July 13 (AP)—Gov. Franklin D. Roosevelt, bearing an olive branch, got his good ship Myth II ready today for a further cruise into Al Smith waters.

A light southwest wind carried the craft out of the harbor into Long Island sound at 9:15 a. m., after a night in which there was scarcely a ripple on the water.

His goal today on his week's vacation sail aboard the 40-foot yawl is Wood's Hole, Mass., the state where Smith strength is notable. Last night, after he dropped anchor in this placid harbor, he greeted J. Harold McGrath, democratic state chairman from Rhode Island and referred to that state's support of Smith at the national convention.

"I not only understand," he said, "but greatly appreciate Rhode Island standing by our old friend Governor Smith and I know now I am going to receive the same display of loyalty."

This was in reply to assurances by a group headed by McGrath that Rhode Island, which stood by Smith in the democratic column again this year. In the McGrath group were Martin J. Flaherty, former Senator Peter G. Gerry, state leader, and Edward J. Higgins, member of the state executive committee.

SENATE PASSES FARM AID BILL

Washington, July 13 (AP)—The Norbeck emergency farm relief bill was passed today by the senate and sent to the house.

The Norbeck bill was approved by the senate without a record vote and very little debate.

The measure provides the farmer shall be paid, in addition to the domestic market price, an adjustment charge equal to the tariff schedules on wheat and hogs and five cents a pound on cotton.

This charge would be collected during the processing of the three commodities and would be paid to the farmer only on that portion of his crop needed for domestic consumption. It would be in force for one year.

DISPUTED ARMY BILL SENT HOOVER

Washington, July 13 (AP)—Congressional action was completed today on the \$390,000,000 army appropriation bill, last of the annual supply measures. The bill now goes to the White House.

Final congressional action came today when the senate agreed to minor house amendments. A long deadlock in the bill was broken yesterday as the house yielded to its demand that 2000 officers be retired.

Silver Falls Loop Road Building To Be Rushed To Early Completion

Chances are good for the completion of the Silver Falls loop road from Salem to Silverton via the falls, stated Hedda Swart, county engineer today, who said it had virtually been

decided to accept the new survey of the Matheny market road from market funds which will finish that market road and clearing is expected to start on that little stretch at once. The new survey on the rest of the highway on the south side is for a secondary highway also to be built by the county but to be paid for from state funds out of the secondary highway pot.

Swart says the state has tentatively approved the location of the survey although formal approval must be given when the survey is finished and estimates of cost made.

The new survey will hit the park (Concluded on page 9, column 8)

ANGLO-FRENCH PACT PLEDGES COOPERATION

French and British Governments To Work Together To Solve Issues

Supplemental to Lausanne—Held Renewal of Entente Cordiale

(By the Associated Press)
A difference of interpretation of a new agreement between France and Great Britain appeared to have developed today immediately after the agreement was announced simultaneously in London and Paris.

The official British interpretation was that both governments, under the accord, will consult each other on all matters which concern them both. Parliament was informed that it had nothing whatever to do with debts owed to the United States.

While Sir John Simon was making the announcement in London Premier Herriot was telling the finance committee in the chamber of deputies that the first consequence of the new agreement is that in the future Great Britain cannot make new arrangements for (Concluded on page 9, column 4)

GLASS FATHERS REPEAL MOVE

Washington, July 13 (AP)—Senator Glass, democrat, Virginia, in the senate today proposed a new amendment to the constitution to repeal the 18th amendment, but to prohibit sale of liquor in saloons or transportation into any states where it is unlawful.

Long a supporter of the present amendment, the Virginian sought immediate consideration for his proposed substitute.

This was blocked, however, Senator Norris, republican, Nebraska, objecting.

The proposed Glass amendment would be inoperative unless ratified by 36 state conventions within seven years.

Its text follows: "Section 1—Article XVIII of the amendments to this constitution is (Concluded on page 7, column 7)

REFUSED DIVORCE FROM PERFECT MAN

Jackson, Tenn., July 13 (AP)—Mrs. Ellen M. Noe, of Memphis, who charmed her husband, Dean Israel H. Noe, Episcopal rector, had physically abandoned her when he had reached such a stage of spiritual perfection that he no longer cared for earthly pursuits, was denied a divorce today.

The circuit court of appeals here refused to grant a separation. Mrs. Noe had taken the case to appeals court here after Chancellor M. O. Kelchman, of Memphis, dismissed the divorce bill in chancery several months ago.

AIMEE SUFFERS SEVERE RELAPSE

Los Angeles, July 13 (AP)—Mrs. Aimee Semple McPherson-Hutton was in a serious condition today following a relapse, according to her physician, Dr. Edward Huntington Williams.

Ill in bed at her Moorish castle at Lake Elsinore, the evangelist suffered two severe nasal hemorrhages and lapsed into a coma last night, the physician said.

Her condition was attributed to striking her head when she fainted Saturday upon being informed Mrs. Myrtle H. St. Pierre had obtained a \$5,000 breach of promise verdict against her husband, David L. Hutton.

Dr. Williams said she was in "no apparent danger" today, but that she would be confined to her bed for several more weeks.

Mrs. Hutton suffered a severe concussion when she swooned last Saturday, said Dr. Williams, "and her relapse was directly attributable to that."

Reported irregularities in the management of the temple community led Mrs. Hutton to demand a thorough investigation by the city social service commission. Friends said she was directing a thorough reorganization of temple affairs.
