The finished product was put out at a cost of 15 cents each, 10 cents for glue and 5 cents for the special Balsa wood in the body of the camera. The boys figured six hours time for constructing the camera and state that the idea was original with the designer.

They obtain their films from size 116, cutting the films for their camera in their dark room with their own specially made jig, making 30 pictures on each strip and cutting four strips, totaling in all 120 individual pictures from each film.

The camera measures 3¼ inches long, 1½ inch wide, and 1 inch thick. The focal length, the distance from the lenste to the films, is one inch. The view finder is a direct view type, and the shutter was taken from a Brownie box camera. The camera incorporates a new idea of moving the film from one picture to the next without the use of a winder.

The boys are also experts at constructing small air planes to sail through the air.

Painful Piles

Go Quick—No Cutting—No Salves

Thousands who have itching, bleeding or protruding piles have not yet learned that quick and lasting relief can only be accomplished with an internal medicine. Neither salves nor suppositories remove the cause.

Bad circulation of blood in the lower bowel causes piles. The hemorrhoidal veins are flabby, the bowel walls weak—the parts almost dead. To get rid of Piles an internal medicine must be used to stimulate the circulation, drive out the thick and impure blood, heal and restore the affected parts.

Dr. J. S. Leonhardt, after years of study, found a real internal Pile remedy. He called his discovery HEMROID, and prescribed it for 1000 patients with success in over 900 cases, and then decided every Pile sufferer, no matter how stubborn their case, might try his prescription with a money back guarantee.

So why waste time on external remedies or worry about an operation when Capital drug store and all good druggists invite you to try HEM-ROID tablets with guarantee of money refunded if they do not end your Pile misery. adv.

Oh Boy! What Joy

LIFT CORNS RIGHT OUT

The English Way

Right from England comes the new, better, joyful way to take out corns—root and all.

Callouses go also and you can rub off that hard skin on heels and toes with your hand—the magic treatment.

Ask at Perry's Drug Store, "the Rexall Store" or any leading druggist for a package of Radox—put a tablespoonfull in a gallon of hot water—do this for 3 or 4 nights in succession—then lift out the corns.

This joyful exhilarating foot bath is simply great—you'll enjoy every minute of it and your burning, sore, tired, aching feet will feel better than they have for years ask for Radox and foot comfort will be yours. —Adv.

POLK LIBRARY POPULAR WITH MANY READERS

Dallas—Mrs. U. S. Laughary, city librarian, reports that in the month of July 1, 834 books were issued from the shelves. This is slightly lower than the number issued in the month of June when 1,942 books were taken out.

The summer months invariably show a distinct decrease in the number of books borrowed as the average distribution for the winter months locally is approximately 3,000 volumes. The number of transients making use of the library this summer is considerably in excess of the usual visitors in this class.

The advantages of the library are not denied to anyone who happens to live outside the city limits as, upon payment of $1 they are permitted to borrow as many books as they care to. A number of people who happen to live in the rural districts are of the belief that a payment of $2 per month is required and Mrs. Laughary, who has been approached frequently on this matter would like this impression corrected. The number of volumes in the library at the present time is in excess of six thousand.

The most recent addition to the shelves is a set of the 14th edition of the encyclopedia Britannica. Books which are badly damaged and beyond repair are sent to the camp at Black Rock where they have proved to be very acceptable.
