

EGG MARKET PRICE CHANGE NOT GENERAL

Portland, Feb. 21 (AP)—Market for eggs continues without general price change. Values are still mixed with sales showing a spread of so much as 2c dozen in the individual grades. Storage movement is gaining.

There is a shortage of live chicken supplies and some in the trade suggest that another price advance is likely. The country is not rushing its supplies to slaughter.

Quite a fair volume of Oregon onions sales is reported at 40c net to the grower. A small volume of foreign business is reported. California is making a small volume at the low price.

There continues a fair movement of seed potatoes to the south. Most of the certified stock of the northern Highland Seed Potato Growers' association, consisting of Burbanks, is reported sold. Local planting moving is still nominal with a few crops going in.

Some further cuts in dry bean prices reported. There is still a fair cranberry sale here.

California sweet potatoes are advancing with stocks exhausted.

There is a better supply of California artichokes with most sales \$4 box. Columbia river smelt are held practically unchanged.

Table potatoes are about steady with the bulk of the demand in 2s.

Inspector Gets Honey Farmer To Get Sting Thru House Bee Bill

With five bills on the calendar for final action today the senate passed two, tabled two and re-referred one. Four new bills were introduced. Honeybees took up most of the time of a brief senate session. A house bill providing for inspection of beehives was passed. It is aimed at elimination of the disease known as foul brood. The bill provides for an inspection fee of 50 cents for the first 10 hives or more, and five cents a hive thereafter, with the maximum fixed at \$15. Several senators opposed the bill on grounds that it was a nuisance act. Senator Burke, though for the bill, wanted it amended so the inspection would be done by Oregon State college. As the bill was he said "the inspector gets the honey and the farmer gets the sting. The average inspector wouldn't know a honeybee from a table bee. It is of course that wouldn't interfere with his going around to sound out political sentiment."

The other measure passed was a senate bill providing for a special tax of one-fourth of 1 percent by

STOCKS SLUMP AFTER HOLDING FAIRLY STEADY

New York, Feb. 21 (AP)—The stock market experienced another sinking spell near the close today after leading issues had ruled steady through the earlier trading.

Volume was light throughout the day. During early dealings, traders were awaiting word from Detroit to determine the outcome of the banking moratorium. No definite announcement was forthcoming and many unloaded holdings to be out of the market over the holiday tomorrow.

Selling was particularly heavy in American Telephone and the issue broke below 99 against a previous close of 100. Radio Corporation was another weak spot. It was sold in large blocks.

Utilities generally dipped with Telephone. Consolidated Gas, which had held firm all day, lost 1/2 point and others of the gas and electric group made corresponding declines.

Railroad shares maintained a firm tone until the last hour when they too, joined the downturn. Union Pacific at one time was at 71, up 3/4 points. Earnings of the road in 1934 were 1932 equal to \$7.29 against \$9.23 in 1931. Near the close Chesapeake and Ohio declared regular quarterly dividend and the stock firm up to the previous close.

Steel common held near yesterday's close all day. Allied chemical was bid up in the allied trading, but it lost the gain later. Aviation shares were in fair demand most of the day. Coppers ruled steady as did gold. Small losses were registered in American Can, Case, General Motors, Du Pont and International Business Machines.

Sales totaled 690,000 shares against 800,000 yesterday.

Dow-Jones preliminary averages were: Industrial 53.99, off 0.27; railroad 25.61, off 0.38; utility 22.75, off 0.28.

Aggregate market value of 10 leading stocks was \$4,796,035,052, against \$4,827,789,936, a decline of \$31,753,884.

Soil Experts Discuss Peat Land Improvement Lake Labish Gathering

Labish Center—Comprehensive in scope and informative in character, the peat land improvement demonstration came to a successful close Saturday afternoon at the Labish Center school house, with over 600 interested persons in attendance.

The demonstration, sponsored by the extension division of Oregon State college in cooperation with the Labish Celery and Onion Growers' associations, was presided over by W. L. Powers, nationally recognized soil expert, and included talks and demonstrations by A. G. B. Bouquet, Professor of Soils, Professor Thompson, L. O. Herrold, and Mr. Powers.

Mr. Powers opened the demonstration with a discussion of the origin, characteristics, uses, and durability of peat lands. The peat in this district is true peat and not a muck, having over 90 percent organic matter in partly decayed condition, with around 2 percent of nitrogen, and is of yellow-sedge formation. The color of the soil, a deep black, is favorable to warmth in sunlight; it is able to absorb great quantities of water, and its power to absorb nutrient bases, such as calcium, magnesium, and potassium, is high. This ability of Labish peat tends to conserve against the degradation of the land, and the marly layer found 7 or 8 feet down enables a high degree of base exchange.

Plant growth is best in a soil fairly acid, in which organic matter and the fundamental element, lime, is present, Powers indicated. The nearly neutral, crumbly, sedimentary, marly willow-sedge peat of Lake Labish is believed to be unexcelled for such purposes.

Tests made by the men in the lake district indicate that the soil shrinkage is about 1 inch a year. A number of factors, such as depth of drainage, composition of soil, and salt in wash, will affect the durability.

In discussing vegetable production on peat, Prof. Bouquet used beets, carrots, lettuce and spinach as examples. When the peat and phosphorus which are naturally deficient in fertilization, any vegetable which may be grown at all will grow abundantly on peat. However, those crops low in phosphorus, such as beans, etc., are naturally not raised.

Beets which yield 9 or 10 ton to the acre are grown on peat near Woodburn. Brown rot, which takes a toll of the crop, may be prevented by irrigation, Bouquet said.

Carrots will produce as high as 40 ton an acre on beaverdam. Seven million pounds are processed a year by a Eugene cannery. The roots grown here are said to be the finest grown in the county.

Little lettuce is grown here, due mainly to a saturated condition in production and consumption. The consumption has increased 261 percent since 1920, when per capita figure was 21 pounds, as compared to 8 1/2 now.

A new treatment for lettuce bottom rot, which ruins many plants just before heading, has been found by New York growers, and consists of an application of 25 to 30 pounds of an ethyl mercury phosphate, at a cost of about \$15 an acre. A bicycle-like machine equipped with blowers is used to apply the treatment. Tip-burn and slime, formerly believed to be due to peculiar weather conditions, is caused by excessive nitrogen supply and resultant succulent growth. The best lettuce strains are the New York 12 and 21, and Imperial F, Bouquet said.

Being unable to economically compete with California production, the quantity of spinach raised here is negligible. New strains, such as the Noble Giant from Holland and the King of Denmark have been improved to prevent too rapid seeding.

Mr. Powers illustrated his talk on fertilizer requirements of peat with lantern slides in the afternoon, and lignin peat from the north as well as other parts of the northwest. Results of experiments with Labish peat in the use of fertilizer indicated marked increases in crop production by the use of potassium, lime, phosphorus, and manure. The first use of peat occurred in 1918, when a crop of deficiency caused the late Mr. Harris to apply to the experiment station for help. Application of peat resulted in a doubling of the crop.

In the absence of Mr. Bouquet, L. O. Herrold conducted the drainage and irrigation conference. Highlights of the discussion were the importance of getting the water table down to a depth of about three feet as soon as possible in the spring. Doon boxing was considered more efficient in new soil, and the use of a sub-solter every three years in ten foot rows was recommended.

Mr. Bouquet's last talk dealt with problems of celery and onion growing. "Know more about your onion and celery land," he advised. When the New York experiment station took up the study of these problems, they found the farmers using 17 different combinations of fertilizers. In New York the thickness of the onion scales and the color was improved by the use of phosphorus. Storage temperatures will affect the seed-productivity of sets. Squares in seedling is induced by high temperatures, and the opposite by low. Onions will freeze at about 28 or 29 degrees. If the onions are not disturbed, and ice crystals are not formed, they will not be harmed.

The importance of growing young celery plants in a temperature of 60-70 degrees is necessary to prevent the plants going to seed. The plants should be hardened by reducing the water supply and lowering the temperature in the hot-house. Spraying with Bordeaux mixture is the only way to prevent celery blight, and prevention is the only cure. The blight is caused from old refuse and spraying often enough to cover new leaf growth with a 2-2-50 Bordeaux will prevent it. A copper lime dust may also be used. Sanitation and air movement will

DUST STORMS BOOST WHEAT 10 PER BUSHEL

Chicago, Feb. 21 (AP)—With severe dust storms reported over a large area of western Kansas, wheat rose almost a cent a bushel today after a wavering start.

No rains were indicated in districts where moisture is needed. For the first time recently wheat price gains were unobstructed by the fact that the United States government financed losses.

Wheat closed firm, 1/4-1/2 above yesterday's finish, corn a shade to 1/4-1/2 up, oats unchanged, and provisions unchanged to 2 cents down. Grains averaged lower early today influenced by Liverpool reports that pressure of Argentine wheat abroad was a disturbing factor. Cables said English millers were getting Argentine wheat at about their own price. Opening unchanged to 1/4 off, wheat sagged all around. Corn started at a shade decline to 1/4 advance, and subsequently receded to below yesterday's finish.

Chains averaged lower early today influenced by Liverpool reports that pressure of Argentine wheat abroad was a disturbing factor. Cables said English millers were getting Argentine wheat at about their own price. Opening unchanged to 1/4 off, wheat sagged all around. Corn started at a shade decline to 1/4 advance, and subsequently receded to below yesterday's finish.

Dairy Council Will Hold Annual Meet

The Oregon Dairy Council will hold its second annual meeting and election Tuesday, Feb. 28 at the Multnomah hotel in Portland.

Several Marion county men are directors of the council, including M. G. Gunderson, Silverton; Warren Gray, Marion; Sidney Miller, Woodburn, and Martin Roetvold, Woodburn.

Reports of the past year's work and plans for the coming one will take up the time of the annual meeting. Despite the financial depression it is reported that sales of butter in the state have increased one and a half pounds per person and the campaign waged by the dairy council is said to have played an important part in this increase.

AURORA BANK OFFICIALS FACE FEDERAL TRIAL

Dr. B. F. Giesy and Zeno Schwab, former officers of the Aurora State bank and the Willamette Valley Mortgage company, will come to trial on an indictment or indictments against them in the circuit court of this county regarding the fact that they have also been indicted by a federal grand jury in Portland on charges of misuse of the mails.

"This was the statement of District Attorney W. H. Trindle today after he had been advised of the indictment brought by the federal grand jury.

"While the action of the federal grand jury may change the time of trial here, somewhat, it will not change the intention of this office to proceed with such trial," said the district attorney. "As the matter stood before the federal indictment, W. C. Winslow, attorney for Schwab and Giesy, was out of the city and we did not expect to get a trial for a month anyway. Now we will see how the matter moves in federal court and the time of trial here will probably be governed accordingly."

The news of the indictment by the federal grand jury did not come altogether as a surprise here. When Schwab and Giesy were tried in circuit court here on charges in connection with handling of Aurora State bank funds, it was commonly known that postal inspectors or their representatives sat throughout the entire trial drinking in the evidence and taking copious notes of the transactions as told by various witnesses.

Schwab and Giesy were freed at the trial of the first indictment but eight more are pending in circuit court here. Just which of these cases will be taken up first when trial is had the district attorney did not say.

MERCHANTS TO SELL SALEM PRODUCTS

Salem merchants will handle Salem made bread and Oregon products to the exclusion of all others, if their customers cooperate. This was the consensus of opinion developed Monday night at the chamber of commerce when approximately 50 persons, including merchants assembled to talk over closer cooperation in the matter of patronizing home industry.

The meeting was called by the industrial department of the chamber.

At the present time 12 out of town firms are trucking their bakery products into Salem, it was learned Tuesday. Upon this basis it was pointed out that if Salem home bread and pastries it would result in the addition of 19 full-time jobs to local concerns.

Among those talking in favor of home industry were E. L. Wiedner, C. P. Bishop, Frank Marshall, Ed Kennedy, J. N. Chambers and T. M. Hicks.

COLLECTOR GETS HANGMAN'S NOOSE

Kalspell, Mont. (AP)—A hangman noose which had seen actual service was among the Christmas presents received by Sam Johns.

Johns is a collector of historical items. His friends decided that a noose used to hang one Frederick Lebeau, April 2, 1899, would make a valuable addition to his collection—so Christmas day there it was, dangling from his Christmas tree.

The Lebeau case was famous in Montana, partly due to the fact that Lebeau was convicted of murder and hung after a coroner jury had returned a verdict that did not connect him with the death of Riley Youakum and his father.

The son and father were found dead in their cabin, apparently the victims of a murder and suicide affair in which the son killed the father, then himself. Lebeau, returning to the scene following the verdict, was arrested on the strength of a companion's testimony, tried, convicted, and hung.

R. F. C. Relief For Clackamas

Washington, Feb. 21 (AP)—Relief loans aggregating over \$1,000,000 today were approved by the reconstruction corporation, Kansas receiving \$641,668, South Dakota \$469,950, North Dakota \$17,500 and Oregon \$14,000.

"The Oregon loan is for Clackamas county for February relief.

Admiral Griffin Dies In Washington

Washington, Feb. 21 (AP)—Rear Admiral Robert Griffin, 78, retired, died in Naval hospital today.

Admiral Griffin was chief of the naval bureau of engineering during the World War. For his services in that capacity he was awarded the distinguished service cross. He also served in the Spanish-American war.

AUTO TAGGING TO BE RESUMED

Due to the fact that motorists have taken advantage of leniency in the part of traffic officers, Chief of Police Minto stated today that resumption of the practice of tagging cars in the downtown district will go into effect immediately. The one hour parking limitation in the downtown zone will be strictly enforced hereafter, he says.

With clerks and business men leaving their cars on the streets all day in many instances, the double parking evil has become greatly exaggerated, the chief states. On some streets during the Saturday afternoon rush, triple parking has often been indulged in and although the streets are exceptionally wide, this latter practice has resulted in traffic being tied up in certain instances.

"Firms who permit their clerks to park all day in front of their establishments often lose trade which would ordinarily go to them," declared Chief Minto. "For motorists finding they cannot park without a reasonable distance to elsewhere to trade. We are giving fair warning that we are going to enforce the law from now on."

DONEY TO SPEAK ON WASHINGTON

Lawyer, minister, college president, "Y" worker during the war, traveler, author, lecturer—these have been the many phases of the life of President Carl Gregg Doney of Willamette university, who will deliver his lecture "Precedence in the Life of George Washington," Wednesday evening in the auditorium of Waller hall. This will be the fourth in a series of lecture-organ concerts presented by the faculty of the university.

Preceding the lecture at 7:45 p. m. Miss Lois Plummer, well known organist of the local First Christian church, will present a program of organ music. Miss Plummer is a former student at Willamette university, and her many friends, both of the university and of the city are anticipating a rare musical treat. Her program follows:

Prelude and fugue in C Major—Bach.

Sicilienne—Bach.

March Nuptiale—Ganne.

Lamentation (Oriental chant)—Moussorgsky.

Allegretto from "A Pastoral Suite"—Debussy.

Meditation—Strauss.

America Triumphant from "Pilgrim Suite" (played in honor of the father of his country)—Dunn.

Continuation Of— Doney To Quit

middle west, and the other in California. He then will get several manuscripts in shape for publication.

The board made it plain that Dr. Doney had merely made the request to be relieved of his duties. He did not have in a resignation. The trustees took no formal action pending the annual meeting in June.

Dr. Doney in 1915 found Willamette with a \$30,000 debt and a \$500,000 endowment. Today there is no debt and the endowment amounts to \$1,700,000.

The president is a scholar of high attainment and if he chose could write after his manner the degrees of B. S., L. B., A. M., Ph. D., L. D., and D. D.

On the occasion of his 25th anniversary he was presented with a book containing 400 congratulatory messages. President Hoover and other leaders in high callings joined in the felicitations.

Montana Fourth In Highway Mileage

Missoula, Mont. (AP)—Montana now ranks fourth in the nation for the amount of highway mileage under construction, the United States bureau of public roads has announced. Federal aid highway construction in this state now totals 617.4 miles, costing approximately \$2,500,000. Federal aid construction approved now totals 240.8 miles. There have been 2,724 miles of federal aid highways approved or constructed in all, in Montana.

MARKET QUOTATIONS

PORTLAND LIVESTOCK
 Portland, Feb. 21 (AP)—Cattle 60, calves 10, steers 550-900 lbs. good \$4.75-\$5.25, medium \$4-\$4.75, common \$3-\$4.00; 900-1100 lbs. good \$4.50-\$5.00, medium \$4-\$4.50, common \$3-\$4.00; 1100-1300 lbs. good \$3.85-\$4.25, medium \$3.00-\$3.25, Heifers 550-750 lbs. good \$4.25-\$4.50, common \$3.50-\$4.00;
