ILLUSION:

A large packing case is exhibited on a raised platform. A young woman climbs into the box. Head, hands and feet protrude, and are held by spectators while the magician takes a crosscut saw and, with the help of an assistant, saws through the center of the box and apparently through the woman.

EXPLANATION:

There are many explanations for this illusion. One method of performing this illusion requires the presence of two girls in the box. One girl curls up in the left half of the box with her head and hands protruding, giving the effect you see illustrated above. The other girl is doubled up in the right half of the box, with only her feet showing. Nobody is sawed in half.

It's fun to be fooled — ...it's more fun to KNOW

Cigarette advertising, too, has its tricks. Consider the illusion that "Flavor" can be achieved by some kind of magical hocus-pocus in manufacturing.

EXPLANATION: Just three factors control the flavor of a cigarette. The addition of artificial flavoring. The blending of various tobaccos. And the quality of the tobaccos themselves. Quality is by far the most important. Domestic cigarette tobaccos vary in price from 5¢ a pound up to 40¢ a pound. Imported tobaccos vary from 50¢ a pound to \$1.15.

No wonder, then, that cigarettes differ in taste—since distinctive, pleasing flavor depends so largely upon the blending of the costlier tobaccos.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

Try Camels. Give your taste a chance to sense the subtle difference that lies in costlier tobaccos... a difference that means all the world in smoking pleasure... in pure, unalloyed satisfaction.
