American industrial system has begun to feel the buoyant effect of 3.2 per cent beer.

The department of commerce said today that brewers are making large purchases of passenger automobiles, motor trucks, barrels, glassware, cereals and malts.

Breweries will purchase soon, according to the department, 4,500 trucks and 4,960 passenger automobiles for use in their business. A total of \$20,000,000 will be spent annually for maintenance. Overhauling of present equipment will call for an additional \$6,000,000.

Trade estimates to the department indicate an annual consumption of 720,000,000 bottles in connection with the sale of beer. Recent orders were large and many small manufacturers are working on special shipments.

Purchases of raw materials for use in manufacture of beer indicate an annual consumption of 2,000 on00,000 pounds of malt, 167,000,000 ands of rice, \$50,000,000 pounds of or and corn products, 41,000,000 pounds of hops, 115,000,000 pounds of sugar and 204,000,000 pounds of grits, wheat, bran and barley.

The department reported that manufacturers of boxes, cartons and fiber board were receiving large orders and that new design refrigerators were being anticipated. Rubber manufacturers, said the department, would participate in sales to brewerles to the extent of

lepartment, would participate in sales to breweries to the extent o

saies to breweries to the extent of \$4,250,000. This was divided be-tween \$3,500,000 in tires and tubes for beer trucks and \$755,000 for oth-er rubber goods such as hose and tubing and rubber boots and aprons.

As a result of the discovery, an audit was authorized for a complete chee's of the special bank account for the 8-year period and was started Tuesday. Lack of definite records is making the task an almost hopeless one and it is difficult to estimate what outside items made up the various deposits.

No complaint has been filed against Black and what action may be taken is problematical. The county will not lose any money as it is protected by a \$15,000 surety bond.
