BROWNE CHOSEN CITY OFFICIAL; BONDS REDUCED

Scio—Councilmen Bryan, Gill, Morrison, Plummer and Roadarmel were present when Mayor W. A. Ewing called the body to order at the June meeting. O. B. Cyrus was at his desk as recorder.

Mayor Ewing stated that he was pleased to announce that all holders of Scio bonds with one single exception had reported favorable to the council's request for a reduction from $2000 to $500 a year as payment on outstanding indebtedness. No word had been received from the one bondholder in question but favorable consideration is anticipated by the mayor, he stated.

Bids from Albany and Jefferson on the proposed metal reservoir for the city water system were read but final action was deferred. The matter of a wood reservoir was discussed but met with little favor.

On motion of Plummer, Dr. S. A. Browne was appointed city health officer. Dr. Browne has been serving in that capacity for several years.

The street and public property committee was instructed by the mayor to investigate and report at the next meeting concerning street matters which had been presented to it by various property owners.

Councilman Bryan stated something should be done concerning the city jail as complaints had been made to him relative to alleged disorderly conduct.

The usual grist of bills was allowed, and payment for new chlorination barels for the water system was authorized.

CAMPAIGN LAUNCHED AGAINST RATTLERS

Scio—A large rattlesnake measuring 38 inches long, with six rattles and a button, was killed on Woodard mountain Sunday by a group consisting of Henry Gescher, Lawrence Van Handel, Joe and Mike Schwindt, John Mayerhofer and John Silbernagel. Two smaller rattlers also were killed.

The party went especially prepared to fight snakes. Rattlers encountered in the open were stoned or clubbed to death, some even being shot. That particular section of the Jordan region seems unusually infested with rattlesnakes at times. Hunting parties often have bagged large numbers in a single day.

Several heavy charges of dynamite were used in the caves and crevices thought to be the rendezvous of the rattlers, and it is believed that many may have been killed by the explosions. Last year 11 rattlesnakes were killed in the same locality.

Periodical onslaughts on the reptiles are made by valley farmers in efforts to prevent them from infesting the lower lands and endangering the lives of human beings and livestock.

Jefferson—Mr. and Mrs. Eugene Finlay and two sons Lawrence and John and Mrs. Finlay's sister, Mrs. Violet Bcknap left Monday on a trip to the Chicago fair. They expect to be gone about a month.

SIGNAL gasoline, the new-day *economy* fuel, is scientifically built to develop every ounce of POWER and mileage intended from modern high-compression motors. Too, it puts new snap in motors made sluggish by carbon.

The remarkable power-qualities of Signal gasoline are due to an improved cracking process which positively eliminates both audible and inaudible knocks, the chief cause of power waste. Thus ALL the power is directed to the *driving wheels* instead of wasted through the exhaust. You actually *feel* the surge of increased power, the flashing pick-up and smoother running.

And, the mileage on your speedometer will *prove* that Signal saves an average of 5 gallons every 500 miles.

Signal is sold at the yellow and black pumps, with a MONEY-BACK GUARANTEE.
