Why Hospitals Use a Liquid Laxative

Hospitals and doctors have always used liquid laxatives. And the public is fast returning to laxatives in liquid form. Do you know the reasons? The dose of a liquid laxative can be measured. The action can be controlled. It forms no habit; you need not take a "double dose" a day or two later. Nor will a mild liquid laxative irritate the kidneys. The right liquid laxative brings a perfect movement, and there is no discomfort at the time, or after. The wrong cathartic may keep you constipated as long as you keep on using it! And the habitual use of irritating salts, or of powerful drugs in the highly concentrated form of pills and tablets may prove injurious. A week with a properly prepared liquid laxative like Dr. Caldwell's Syrup Pepsin will tell you a lot. A few weeks' time, and your bowels can be "as regular as clockwork." Dr. Caldwell's Syrup Pepsin is an approved liquid laxative which all druggists keep ready for use. It makes an ideal family laxative; effective for all ages, and may be given to the youngest child.
