"A trip to Lake Arrowhead sold me," says F. C. Ripley, Pres. of the California Ski Association. "Even after the motor had stood in that mountain cold for hours, I needed to use surprisingly little choke. And my mileage was better than in summer!"

THERE are thousands and thousands of motorists who will tell you the same thing. Thermalized gasoline has made their cars perform this winter as never before.

It's not just "quick starts"... but... full power while a motor is still cold... the choke pushed back within half the former time... winter mileage jumped from one-half mile to two and even three more miles to the gallon!

Of course it's hard to believe. But when people in every neighborhood are talking about such astounding results, at least you owe yourself a tankful to try.

★ THERMALIZED is the name given Shell's combination of processes by which gasoline is made to deliver full power in a cold engine. Originally produced under terrific heat, Super Shell is redistilled, made 20% more concentrated. Every gallon for your community is Thermalized for local temperatures.
