100 ACRES SPUD FOR RELIEF MAY BE PLANTED HERE

Chances are that there may be as high as 100 acres of spuds put out in home garden patches for relief work, or for relief work on some other basis than home garden patches as compared to a probable 40 acres planted last year.

The plan for spud growing will be worked out by the county committee, the necessity for larger plantings this year being brought home to the committee by Frank White, field relief man, for the state committee, in an interview with the county committee last week.

Whether individuals who plant the seed furnished by the committee will be asked to secure their own ground, such as city lots now unused and going to weeds, or whether the committee will endeavor to secure a tract of land close to the city, say 100 acres, and work out the planting, tillage and digging under some plan, will probably be determined at an early meeting.

Last year 200 sacks of seed potatoes, 100 pounds to the sack, were cut up and distributed in 20-pound packages. In cases where larger plantings were needed two or three or more sacks were given out to a person.

MEDIATORS SEEK SETTLEMENT OF COAST STRIKE

Edward F. McGrady, assistant secretary of labor, arrived in San Francisco from Washington to conduct negotiations looking to the settlement of a strike which has tied up shipping in Pacific Coast ports and caused violence in some of them.

STOCK MARKET SALES LIGHTEST FOR TEN YEARS

New York, May 21 (AP)—Today's stock market session was the lightest in 10 years, and other markets were correspondingly dull.

Contrary to usual procedure, however, prices moved in a narrow range. Ordinarily in a dull and uncertain market there is a decline.

Wall Street was awaiting the president's message on silver expected tomorrow. In the hope it would be constructive for silver metal, traders bid up the silver issues 2 to more than 3 points and they provided the only item of interest in the entire lot.

Chicago, May 21 (AP)—Thirty-five thousand members of the Minneapolis Building Trade Workers' union today voted to go on strike in sympathy with the striking truck drivers. The new strike will cause a paralysis in all building activity, and will start at 5 p. m. today.

News of market importance was featured by a dividend increase in DuPont from \$2 annually to \$3.00, an unexpected move, and the Standard Oil of New Jersey 1933 report showing net income equal to 97 cents a share, against net of 95 cents a share in the preceding year.

Sales today totaled 380,000 shares, the lightest since June 2, 1924, when the total was 306,000 shares. Sales in the final hour were 120 shares or about one-third of the day's trading. On Friday, the previous full session, sales were 911,000 shares.

Officers said Shoemaker refused to move on when the police and special deputies, with which the market place members of the Minneapolis Building Trade Workers' union today voted to go on strike in sympathy with the striking truck drivers. BERRY PICKING FOR SEASON IS FIXED

Woodburn — The semi-annual meeting of the Woodburn Berry Growers' Cooperative association was held at the Artisan hall Saturday afternoon with about 175 present. The meeting was held for the purpose of fixing prices for picking loganberries which was fixed at 1 1/2 cents per bushel.

H. F. Butterfield, president of the association, presided. A general discussion of the berry situation and prices was held. A definite price has not been established and the deal is still pending but will probably be settled this week.

The heavy rain the last of last week, rather than damaging the strawberries and muddying them up, seemed to work heavily to their benefit instead, according to reports from growers, and the berries coming in today from over the week's picking are said to have been of the finest quality yet delivered from patches in this district and berries were also coming in in larger quantities.

Bushings seemingly in the offing now for the rest of the season follow the drenching rain should work all for the benefit of the berry growers and produce extra quality fruit.

WHEAT CROP CUT IN EAST OREGON

Peddleton, May 21 (AP)—A 30 percent wheat crop for eastern Oregon unless weather conditions change is predicted by J. W. Maloney, collector of internal revenue and former wheat farmer of Peddleton. The present condition was ascribed to the fact that wheat went through the winter without the usual moisture.

A below normal crop was seen for Umatilla county and unless conditions change soon, the yield was expected to be around four million bushels.
