

BUELL GRANGE ASKS SEEKERS OF POSITIONS

Buell Grange is sponsoring a meeting at the Grange hall at Buell Friday evening, November 2, to which all candidates for county and state offices are being invited to be present, and will be given a few minutes to present their qualifications.

The meeting will start at 7 o'clock with a supper for which 50 cents a plate will be charged. Following the supper the open meeting will be held, to which those who do not wish to attend the supper are invited.

The entire proceeds of the supper will be used to make the final payment on the Buell park. It is very important that the money be raised at this time, as it is possible to get a SERRA fund of \$500 to be used in improving the park, but title has to be secured first.

The three candidates for governor have been invited, and their headquarters have given assurance that they will be present. Also the candidates for congress have indicated their intention of being at the meeting.

Mayor Lyle Finseth of Dallas will

prelate at the meeting, and the following committee will have charge of arrangements: T. E. Blair, chairman, Mrs. Sarah Stone for Buell community, Mrs. H. E. Allen for Harmony, Mrs. Hugh Stuart for Fern district, Lloyd Blair, master of Buell Grange, in charge of park fund, G. D. Stewart, republican precinct committeeman, and Frank Paik of Williamson, democratic precinct committeeman.

Everyone is urged to attend the supper, as the final payment of \$100, part of which is now on hand, must be raised. The committee assures those who attend will get their money's worth.

Candidates are requested to have cards available to be presented at the door to be used by the chairman in introducing them.

ATTEND INSTITUTE

Lyons—Teachers from this vicinity who attended Linn county institute in Albany Monday were Mr. and Mrs. James Gordin from the Lyons school, Mrs. Helen Gibbs and Miss Zeta Frichard from the Fox Valley school and Mrs. Elizabeth Frichard from the Weasel Flat school.

CARBON WELL IN

El Paso, Tex. (AP)—A new well producing 648,000 feet of carbon dioxide gas has been bought in at McIntosh, N. M., where a dry ice plant is being established to produce 15 tons of ice per day.

PRESIDENT TO CURB SURPLUS

Washington, Oct. 25 (AP)—President Roosevelt is hopeful that a definite means of enforcing measures to prevent enormous oil surpluses will be worked out by federal agents now in the mid-continent field.

Mr. Roosevelt said at his regular press conference in response to inquiries that the department of justice had sent experts into the mid-continent field.

He said if the theory of preventing enormous surpluses was to be established there must be adequate enforcement which did not now prevail.

He offered no suggestions on enforcement methods.

Asked about the government building equipment and leasing it to the railroads, the President said the government wanted to help in every way possible but he made no commitment on that point.

He recalled that the government made loans last year for the purchase of steel rails and added that if loans were made again this year for this purpose he believed the rate could be cut from 4 1/2 to 3 1/2 per cent.

Asked about several government vacancies, the President said he

LIQUOR BUYERS WILL GET HELP

Paris (AP)—In an effort to improve and develop the relations between American buyers and European merchants of wines and spirits, an organization has been formed here under the presidency of A. F. Du Pont, of Baltimore.

Named the Association of American Buyers of Wines and Spirits in Europe, the new organization expects to assure that importers in the United States will receive genuine products. It will also aim to maintain the drinking standards of pre-prohibition America and to protect the interests of buyers on this side of the Atlantic.

Members of the organization are pledged to abstain from transacting any business or entering into any arrangement that would interfere with the commercial interests of another member.

At the first meeting of the organization, Du Pont, who has lived here and other parts of Europe for many years and is well acquainted with the liquor trade of two continents, was elected president. Arthur Lesser, of New York and Chicago, and J. Goirand, of Paris and New York, was chosen secretary and treasurer.

FRENCH POLICE FIND TWO DICTAPHONES

Paris, France (AP)—Somebody apparently is interested in what the police talk about in the Prefecture of the Ariège.

Two dictaphones, cleverly hidden in the walls of the office of the Departmental Prefect, have been discovered. Although they had apparently been functioning for more than a year, mystery surrounds the purpose of the installation. There was no clue as to who was interested in the Prefect's conversation.

SHELLENBACK TO MANAGE STARS

Los Angeles, Oct. 25 (AP)—Whether Oscar Vitt, the popular manager for the past nine years of the Hollywood Stars, was "fired" or just resigned today, but at least it was definite that Frank Shellenback, the Stars' veteran spitballer, was the new manager.

Vitt says he was asked to quit the job as plot for the Stars. William Lane, owner of the Hollywood club, says Vitt "resigned." Anyway, Vitt is definitely out as manager of the Stars.

"It was a big surprise—and a shock to me," said Vitt. "The first I knew of any impending change was a letter from Mr. Lane asking for my resignation for reasons of economy."

Vitt said his future plans are indefinite.

Hollywood club officials, however, intimated that Vitt was seeking managerial duties either at Oakland, Sacramento or Portland.

"I have no immediate prospects and reports of other managerhips is news to me," said Vitt.

Shellenback, the new manager, has won more coast league games than any other pitcher, his total

CORNSTALK RIVALS JACK'S BEANSTALK

Viola, Ia. (AP)—A stalk of corn in a field planted by Dillon Atherton grew to a height of 131 inches in 75 days. Planted June 12, the stalk grew with the rapidity of Jack's beanstalk and reached 101 inches by July 25. Atherton said the corn averaged 5.28 inches growth per day during the period from July 18 to July 25, a week in which there was plentiful rain combined with excessive heat, conditions which are ideal for corn.

Atherton said the entire field in which the stalk was planted averaged 2.1 inches during the first 60 days.

Graduation classes from Iowa colleges numbered 2,900 men and women this year.

YOUR EYES

No matter how excellent the mechanical work in a pair of glasses, it counts for nothing unless the formula from which the lenses are ground is the correct one for YOUR EYES. The formula will be correct when based on the result of a careful 21-Point Examination.
