Is This Too Good for Your Cough?

Cremolium may be a better help than you need. It combines seven helps in one. It is made for quick relief, for safety. Mild coughs often yield to lesser help. No one can tell. No one knows which factor will do most for any certain cough. So careful people, more and more, are using Cremolium for any cough that starts.

The coat is a little more than a simple help. But your druggist is authorized to guarantee it, so it costs nothing if it fails to bring you quick relief. Coughs are danger signals. For safety's sake, deal with them in the best way known. (adv.)

Town Club Scene Of Smart Luncheon

Silverton—Mrs. M. C. Woodard and her daughter, Mrs. William Perrin, entertained a small group of Silverton friends at luncheon recently at the Town club in Portland. The affair was in honor of Mrs. Walter Bell of England, and Mrs. Edwin Mutch of Canada, both of whom have been guests here.

JOSEPHINE BROSS
dramatic soprano, who will be presented at Waller hall February 8. The concert will benefit the Salem Philharmonic orchestra.

Philharmonic Benefit Soon

A musical event scheduled for February and anticipating the interest of the capital's musical contingent will be given at Waller hall on Wednesday, February 8, for the benefit of the Salem Philharmonic orchestra association.

Featured on the program will be Miss Josephine Bross, dramatic soprano, Miss Barbara Powers, violinist, and Ruth Bedford, pianist.

Miss Bross has recently returned to Salem from Toronto where she studied with John Howell, dramatic and operatic coach.

Miss Powers is a member of the first violin section of the Philharmonic and a student at Oregon Normal school at Monmouth. Miss Bedford is a Salem teacher and well known for her splendid work as soloist and accompanist.

DEEP SEA GLASSES MADE FOR BEEBE

Rochester, N. Y. (AP)—An instrument which will aid Dr. William Beebe, famous undersea explorer, in measuring distances and gauging visibility underneath the water, has been manufactured here.

The instrument was made in the optical laboratories of Bausch and Lomb company and is similar to field glasses, but has a mill scale which is corrected for the index of refraction of water.

Manufacture of the instrument resulted from a lecture given here by the famous explorer, during which he disclosed that he used ordinary glasses to judge the distance and visibility but admitted that his conclusions were not always accurate.

The new "undersea" glasses were forwarded to him for use in his explorations.
