

NORMAL PEOPLE GET ASSISTANCE BY GOVERNMENT

Monmouth—Oregon Normal students, totaling 80, are at present earning their higher education under the plan of the current national administration in its country-wide national youth administration program for aiding deserving students.

Of the number here 29 are men students and 51 are women, working on a variety of projects and earning a total of \$840 a month, or a total of \$10,860 for the nine-month school year.

The monthly earnings of the N. Y. Y. A. students runs from \$5 to \$164 with a maximum for any one month set at \$20 and a year's total maximum at \$135. The average per month can only amount to \$15.

To qualify for this type of aid a student must furnish satisfactory evidence that he is deserving and must maintain at least a C average during the time he is so aided. There is no restriction involving the use to which a student puts his money.

Monmouth's students in the federal aid program are employed chiefly in clerical work, psychology and biology laboratory assistants, library and general clerical work are the chief projects, with several of the men students laboring on the campus. The redecoration of the interior of the Independence training school is the work of one group of men.
