Silverton—Since the tragic death of Bruce Baldwin, two year old son of Mr. and Mrs. K. R. Baldwin of Silverton, a few weeks ago, much conjecture concerning the cause of his passing has been in evidence. It was commonly believed the child was poisoned from eating fourteen cathartic tablets.

During the week Dr. K. Bernard Fontus of the University of Chicago and Dr. M. L. Bridgeman of the University of Oregon have been in consultation with the Silverton physicians concerning the case.

Dr. Fontus, on leaving here Saturday afternoon, made the statement that the death of the child was due to a form of pernicious vomiting which occurs in susceptible children. He explained that the little boy had taken an over-dose of the cathartic after he had begun to be ill, and that the symptoms causing his death were entirely different from those resulting from an overdose of phenolphthalein; hence the deduction was that the medicine did not cause the child's death.

If a cold has developed, rub Vicks Vapo-nol on throat and chest at bedtime. Vapo-nol acts direct—two ways at once: (1) By stimulation through the skin like a poultice or plaster; (2) By inhalation of its medicated vapors direct to inflamed air-passages.
