SEEKS REVISION OF BANK LAWS

Topeka, Kas., July 21 (AP)—A survey looking toward "simplification and improvement" of federal banking laws was projected by Rep. John B. Hollister, republican of Ohio, today as a possibility if Governor Alf M. Landon wins the presidency.

Hollister, the ranking member of the house banking committee, conferred twice with Landon yesterday as the republican candidate put finishing touches on the 3500-word address in which he will accept the nomination Thursday night.

"I was particularly interested to talk over with him the matter of a non-partisan commission of experts on banking to begin as soon as possible a basic study of all our federal banking laws with a view to their simplification and improvement."

"The operation of our national banks, of the federal reserve system and of the federal deposit insurance corporation are closely inter-related, but frequently laws governing one of these establishments are passed without proper consideration of their effect on others, leading to conflicts and ambiguities. In addition, experience has shown us that there are many ways in which banking may be improved by additional legislation."

"I found Governor Landon to be very well informed on all these (financial) subjects," Hollister said, "not only with respect to their legislative history but in their bearing on our present national problem."
