

Legion Peace Plans Outlined Linn Veterans

Albany—Progress toward enactment of the American Legion's peace program into legislation was recounted Wednesday night before nearly 100 Legionnaires from posts of the Willamette valley council by O. E. (Mose) Palmateer, Salem, department commander of the Legion, at a meeting in the Veterans' Memorial hall.

The measure, known as the universal service act, apparently has a good chance for passage at the present session of congress, Commander Palmateer said, despite strong opposition of radical groups, some peace organizations, and some capitalists.

The act, Palmateer explained in brief, would render capital, labor and resources of the United States as well as fighting forces subject to conscription in time of war.

Should the bill become a law, the department commander said, it would, in the opinion of war department officials, constitute the equivalent of a standing army of 1,000,000 men. It provides not only for universal conscription, but also for federal regulation of prices and wages, he said, to prevent profiteering in time of national emergency.

"We are not opposing profit, Palmateer said, but we are opposed to such excessive profits as were made in this country during the World War, when more men were made millionaires than lost their lives in action."

Hap Southard, Lebanon, Willamette valley council president, presided at the Legion meeting and Mrs. J. Cox, Florence, at the auxiliary meeting.

Present were Legionnaires and auxiliary members from Monroe, Lebanon, Cottage Grove, Florence, Eugene, Toledo and Corvallis. The next meeting will be held in Newport February 20.

Colorful "Claggett" Closes its Career

Independence—The "old ferry boat," Claggett No. 1, is in a precarious condition on the bank of the river at the ferry slip on the Marion county side, having been floated by the a swimming tank of the citizens of this community.

Many memories cling around this old boat since it went into the service several years ago. The miles it has traveled are incalculable; lives have been lost in its traveling back and forth and perils have been avoided by quick action of its operators, either from broken down machinery or floating debris.

When it went into service it was considered the last word in ferry construction, so different that those of a nearby day, which pioneers remember and tell the story of propelling it across the river with oars, or with mule or horse power. Now it lays a pitiful wreck upon the shores of the Willamette river, having given place to a more up-to-date power driven craft.

During the rush season of the year as many as 20 cars may be carried at a trip, and with considerable saving of time, with the new service, while under the old service often a half mile of cars would be waiting on either side of the river for transportation.

The new ferry has been named "Claggett II" and is operated on two eight hour shifts a day, by the Lawrence brothers, who have been in service on the river here for about 15 years. They have known many thrills and perils of the old river and the old craft.

The affair is set for 7 p. m. and will be held in the city hall.
