

Stocks Rally After Early Irregularity

New York, May 18 (AP)—Stocks rallied today after early irregularity. Bonds, wheat and cotton futures firmed.

Improvement in market tone was ascribed to an indicated rise in car loadings for last week; a better than seasonal rise in electricity production; a decline in gasoline stocks and a declaration of the regular quarterly dividend by American Telephone and Telegraph.

An optimistic statement by R. B. White, president of Western Union Telegraph company, caused that stock to firm fractionally. American Telephone eased a point or so when the dividend news was released.

United States Steel and Bethlehem advanced a point. Utilities were unsettled for a time by reduction in the public service of New Jersey common dividend. The street looked forward, however to settlement of the Tennessee public service situation. National Power and Light directors will act on the offer of the city of Knoxville to buy Tennessee public service. Market experts anticipated the deal will materialize and that it would set up a formula for other deals in the area.

International Telephone and Telegraph, most active issue on the board, rose to a new high at 9 1/4 %.

Railroad shares were narrow movers and were about unchanged. Chemical issues were in fair demand at gains ranging to more than a point. McIntyre rose a point. Copper shares were strong despite further recessions in the export price. Motors held small gains.

Dow Jones closing stock averages: Industrial, 117.02, up 0.66; rail, 22.54, unchanged; utility, 19.45, off 0.05; 70 stocks, 37.42, up 0.13.

Stock sales approximated 400,000 shares, against 410,000 yesterday. Cur stock sales 85,000 shares against 93,000.

Ranchers May Demand Action

Washington, May 18 (AP)—Western ranchers gave notice yesterday they would demand congressional action to curb operations of eastern wool dealers if a special senate investigation of the wool industry indicated the growers were being "double-crossed."

F. R. Marshall, of Salt Lake City, secretary of the National Wool Growers' association, J. Byron Nelson, secretary of the Wyoming Wool Growers, and G. W. Cunningham, secretary of the Texas Sheep and Goat Raisers, agreed during an interview that:

"If the committee finds that growers are getting what amounts to a double cross from dealers who buy wool on consignment and at the same time speculate in wool for their own account, then we want congress to do something to protect the wool grower."

Marshall said he thought the committee, which will start public hearings Thursday after a two and a half year investigation into the wool industry, "could draft remedial legislation that would put a stop to dual operations by dealers if it is shown that the growers are suffering financially as a result."

Heavy Smudging In Rogue Orchards

Medford, May 18 (AP)—The first general smudging of the season occurred in the orchards of the upper and central Rogue river valley early this morning, when the mercury dropped to 33 degrees, and was reported as low as 28 and 29 degrees in some spots.

Some damage was reported to early garden truck, by frost observer Roy J. Rogers. Rogers said there was no damage to pears, now thumb end size, or small fruits, a preliminary survey indicated. Clear with no change in temperature is predicted for tonight. Continued cold might cause a "drop" in the pear orchards.

Premium Rates Wheat Crop Insurance

Corvallis, May 18 (AP)—Average county wheat loss figures for Oregon on which premiums under the new government insurance will be based were received here from Washington, D. C., today by the state AAA office.

Applying to 27 wheat growing counties of the state, the figures show a range from two bushels per acre for 75 per cent coverage in Crook and Washington counties, to a low of one-tenth of one bushel per acre for 50 per cent coverage in Union county.

These are not actual premium rates, officials of the state office here explained, but they approximate the average premium rates for the several counties. Individual premium rates will be arrived at through combining these average county loss figures with the record of average yields and losses on the individual farm concerned.

Crop insurance premiums under the new program applying to wheat in 1938 are payable in wheat or its cash equivalent. The insurance corporation has assembled 10 year average yields and losses for every wheat county in the United States, on which to base premium payments.

Following are figures for the various counties, showing, in order, the basic bushel loss figure on a 75 per cent yield coverage, on a 50 per cent yield coverage and the 1926-35 average yield per acre:

Baker, 1.0, 3.2, 23.7; Douglas, 1.3, 5.18, 4; Jackson, 1.0, 2.4, 24.5; Joseph, 1.3, 5.20, 7; Klamath, 1.3, 5.22, 4; Lane, 1.2, 3.17, 17.0; Marion, 1.8, 7.23, 1; Umatilla, 5.2, 25.9; Union, 7.1, 24.1.

Warning on Cherry Flies By Rieder

The most important insect enemy of the cherry industry will soon make its appearance, according to Robert E. Rieder, assistant county agent and county horticultural inspector. The cherry fruit fly, which causes the maggot in the fruit, emerges from the ground as a fly about the first of June in ordinary years, or about the time the Royal Anne cherries begin to show color. The flies "sport" around a few days after emerging from the soil before laying eggs, and it is during this period that they are controlled.

After the eggs are laid in the cherry it is too late to prevent wormy fruit, warns Mr. Rieder.

The recommendations this season are essentially the same as those of recent years, namely a poison bait spray, consisting of lead arsenate 1/2 pound, molasses 2 quarts, and water 10 gallons. The upper surface of all leaves should receive the spray, and also inter-planted trees of other fruits or nuts, and fence rows should be sprayed. The spray should be directed above the tree allowing it to fall on the upper surface of the leaves. Sprays should be repeated after every rain, states Mr. Rieder.

The time of fly emergence and application will be announced from the county agent's office and a second

Telephone Dividend

New York, May 18 (AP)—American Telephone & Telegraph Co. directors today voted the usual quarterly dividend of \$2.25 a share on capital stock, payable July 15 to stock of record June 15. The dividend involves a distribution of about \$42,000,000 among the shareholders.

Lamb Show Staged at Turner On June 4

The Marion county fat lamb show will be held at Turner June 4 under the sponsorship of the Cloverdale Farmers' union. Cash prizes will be offered for single ewes in open classes, wether class, single ram eligible for registration and pen of three lambs, ewes or wethers. In the 4-H club classes prizes will be offered for a single lamb, ewe or wether; pen of three lambs and the grand champion fat lamb. Special features will be a sheep calling contest, dog trials in sheep herding, wool exhibit and a lamb dressing demonstration.

Lambs must be entered by June 1 and in the pens by 10 o'clock the morning of June 4. No entry fee will be charged and no admission charged to the grounds. Judging will start at 10:30 o'clock with the lambs to be judged according to market value. Lambs need not be fitted.

The 4-H club members will not be permitted to show in open classes excepting class for champion of show. Entries for 4-H clubs should be registered with Wayne Harding, county club leader and for other classes mailed to Harry Riches, Marion county agent. The primary object of the show is to encourage breeding and feeding of lambs of better quality.

Judges will be Harry Lindgren, Oregon state college and E. L. Clark, Portland. The committee in charge consists of Eddie Ahrens, chairman; Carl Booth, Arthur Chalk, Otto Pfennig, Henry Ahrens, Harry Riches, and Wayne Harding.
