

Mill Site Development Program Before Electorate

Lebanon Faces Two Measures Tuesday Ballot

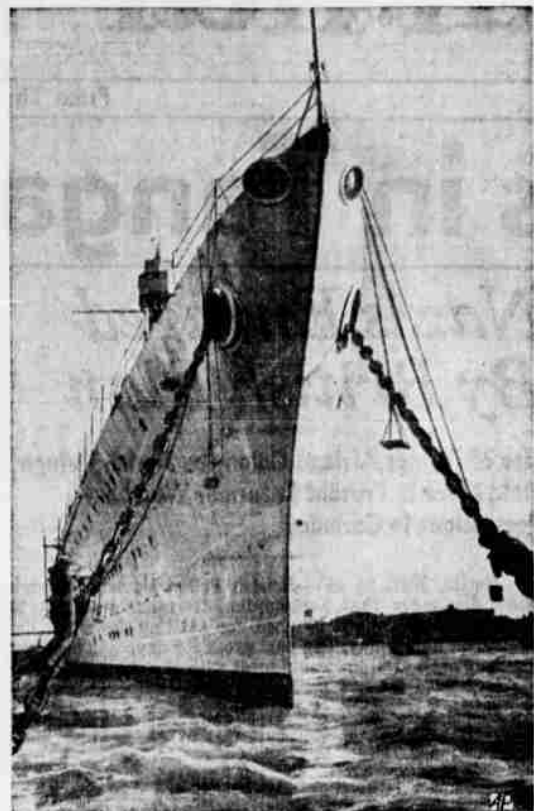

Lebanon—This city will vote in a special election tomorrow on the proposal for municipally owned and developed mill sites within or without the city limits.

The polls will be opened from 8 to 8 o'clock. Voting places are: Lebanon precinct, Kirkpatrick Motor company show rooms; North Lebanon precinct, high school gymnasium, and South Lebanon precinct, the city hall. The South Lebanon precinct vote is generally in the Odd Fellows hall, but was changed to save as much cost as possible.

A vote is asked on two measures, the one to authorize the city council to appropriate up to \$17,000 of surplus city funds for purchase and development of industrial sites, and the second to amend the charter making such procedure possible.

The two measures have been supported by many groups and individuals. They have the hearty endorsement of the Lions and Commercial clubs, the United Workers League and other organizations. Few objections have been stressed, and it is indicated the plan will carry.

Pamphlets explaining the two proposals have been mailed to all Lebanon voters, and other pamphlets printed at the order of the Commercial club and explaining the measures even more fully are available at Lebanon business houses.

Rodent Control Project Gets WPA Approval

Albany—Subject to certain restrictions the 13,000-acre WPA rodent control project which had been petitioned by residents of the Santiam valley above and for some distance below Lebanon has been approved by the WPA at Washington, D. C. according to word received this weekend by H. F. Merrill, district resident WPA engineer for Linn county, from Ivan Oakes, deputy WPA administrator at Portland.

The restrictions are, according to the letter received by Mr. Merrill, that "no federal funds will be expended for any unit of work under this project until property permission and easements have been obtained covering that part of the property, not owned by the sponsor, necessary for completion of a useful unit of work, and now federal funds will be used to obtain such permission and easements."

The project was first petitioned on August 6. It provides for the extermination of gophers and other rodents within the area defined in the petition, encompassing most of the land contiguous to the Santiam river above Jefferson and below Waterloo, owned by approximately 150 farmers, of whom 140 petitioned formation of the district.

According to terms of the district's organization the county will advance \$380 to constitute contribution for purchase of poisons and other materials, while the WPA will furnish labor valued at an estimated \$8,328.
