NIGHT COUGHING
CAN OFTEN BE PREVENTED

If your child often coughs at night because of even a slight cold—do this at bedtime: Thoroughly massage Vicks VapoRub on throat, chest, and back. VapoRub's poultice-vaporization tends to keep the air-passages clear, helping to maintain normal breathing through the nose, and so reducing mouth-breathing (the frequent cause of night coughs). Try it tonight—learn for yourself another reason why VapoRub is a family standby in more homes than all other medications of its kind put together.
