Luella Perkins was the guest of friends in North Bend over the Memorial day holiday.

Funeral services for Anna M. Penn, 60, resident of Myrtle Point for seven years, were held in Salem recently.

Snell Hits OPA Meat Shortage

The current meat shortage was caused by the mishandling of livestock production and marketing regulations, Governor Earl Snell said today in a radio address.

"It is unfortunate indeed that livestock production and marketing regulations have been so badly mishandled with the resultant meat shortage," he said. "Protests have been made but without results."

Governor Snell said Oregon's "food production has been both magnificent and unusual."

"Regulations have not always been wise. Some have seemed to be discriminatory, and some seem to have been made without knowledge or understanding of agricultural industry problems. Yet certain wartime regulations seemed timely and in order."

Asserting that the nation now must finish the job of defeating the forces of barbarism, the governor said:

"In that task, food production is vitally important. It sustains our armed forces; and certainly, humane considerations demand that we render such assistance as possible to a devastated and hungry Europe."

The governor declared that bad spring weather has handicapped farmers, but they must bend every effort to fill their contracts.

He said home gardeners have been of great help in alleviating the food shortage, and that they must continue to plant all they can.

Cancel Foreign Meat Shipments

Washington, June 1, (AP)—The government will cancel all lend-lease and foreign relief meat shipments during July, August and September, it was learned today.

The action is expected to increase slightly the share of U. S. civilians.

Removal of the meat from lend-lease for a period of at least three months will affect Russia more than anyone else. During April, May and June the Soviet Union was assigned 300,000,000 pounds out of the lend-lease total of 325,000,000 pounds, mostly canned "Tushonka," a beef and pork combination.

Officials said the denial of meat for foreign relief would come as a "grave disappointment" to liberated peoples. The only meat exports in July, August and September will be for the U. S. armed forces.

The clamp-down on meat exports was seen as a move to ease the extremely tight situation here at home. During the present quarter-year civilians are getting meat at annual rate of 110-112 pounds, a new record low. Officials said improved distribution is expected to make considerably larger quantities available in areas now suffering the worst shortages.

Snell Hits OPA Meat Shortage

The current meat shortage was caused by the mishandling of livestock production and marketing regulations, Governor Earl Snell said today in a radio address.

"It is unfortunate indeed that livestock production and marketing regulations have been so badly mishandled with the resultant meat shortage," he said. "Protests have been made but without results."

Governor Snell said Oregon's "food production has been both magnificent and unusual."

"Regulations have not always been wise. Some have seemed to be discriminatory, and some seem to have been made without knowledge or understanding of agricultural industry problems. Yet certain wartime regulations seemed timely and in order."

Asserting that the nation now must finish the job of defeating the forces of barbarism, the governor said:

"In that task, food production is vitally important. It sustains our armed forces; and certainly, humane considerations demand that we render such assistance as possible to a devastated and hungry Europe."

The governor declared that bad spring weather has handicapped farmers, but they must bend every effort to fill their contracts.

He said home gardeners have been of great help in alleviating the food shortage, and that they must continue to plant all they can.

"Regulations have not always been wise. Some have seemed to be discriminatory, and some seem to have been made without knowledge or understanding of agricultural industry problems. Yet certain wartime regulations seemed timely and in order."

Asserting that the nation now must finish the job of defeating the forces of barbarism, the governor said:

"In that task, food production is vitally important. It sustains our armed forces; and certainly, humane considerations demand that we render such assistance as possible to a devastated and hungry Europe."

The governor declared that bad spring weather has handicapped farmers, but they must bend every effort to fill their contracts.

He said home gardeners have been of great help in alleviating the food shortage, and that they must continue to plant all they can.

Snell Hits OPA Meat Shortage

The current meat shortage was caused by the mishandling of livestock production and marketing regulations, Governor Earl Snell said today in a radio address.

"It is unfortunate indeed that livestock production and marketing regulations have been so badly mishandled with the resultant meat shortage," he said. "Protests have been made but without results."

Governor Snell said Oregon's "food production has been both magnificent and unusual."

"Regulations have not always been wise. Some have seemed to be discriminatory, and some seem to have been made without knowledge or understanding of agricultural industry problems. Yet certain wartime regulations seemed timely and in order."

Asserting that the nation now must finish the job of defeating the forces of barbarism, the governor said:

"In that task, food production is vitally important. It sustains our armed forces; and certainly, humane considerations demand that we render such assistance as possible to a devastated and hungry Europe."
