### Appendicitis

Dr. J. W. Willett of the Capital Drug Store

If you believe you have any symptoms of appendicitis, the safe and sane thing to do is to consult your physician.

He may find the cause of the pain, ache or disturbance to be a minor ailment, and treat it accordingly. Or he may find appendicitis present. In either event, your having consulted him is a wise move.

It is, of course, a wise move whenever persistent pain of any nature is present. Self-medication is not to be recommended except in the simplest cases, since the doctor is the only one qualified to correctly diagnose any upset.

Should drugs be needed, ask your doctor to recommend a good drug.

This is the 37th of a series of editorial advertisements appearing in The Capital Journal each Friday.
