## Bombers Blast U-Boat Pens

Wiesbaden, Germany, May 21 (AP)—American and Britain's heaviest bombers are striking at the \$50,000,000 submarine pens near Bremen with "earth shock" bombs in the largest experimental air bombardment launched in Europe since the end of the war, it was officially disclosed today.

Four-engined B-29's, which never flew in combat over Germany, together with B-17 Flying Fortresses and British Lancasters, are shuttling between Bremen and the RAF central bomber establishment at Marham, England, for the continuing tests.

A statement by U. S. air force headquarters here said the purpose was to determine "the full possibilities of destroying the massive targets by earth-shock." British-developed bombs ranging up to 22,000 pounds and American 4500-pound "rocket-assisted" armor-piercing bombs are used.

The statement did not mention whether Soviet observers had been invited, but none has witnessed the tests.
