"The Company agrees..." BEFORE the New York Stock Exchange admits the securities of any company to its trading list, that company enters into a number of agreements with the Exchange, all in the interest of the investing public. Of these many agreements, the most important of all is this: The company agrees to disclose, at regular intervals, the basic facts about its operations and financial condition. Because of this agreement, investors have access to a wealth of essential information. As a result, it is possible to make facts the sole basis of investment decisions, so far as securities listed on the New York Stock Exchange are concerned. Understandably, this Exchange cannot eliminate the risks which accompany ownership of securities—risks inevitable in the possession of any form of property. But its listing agreements do provide for disclosure of facts necessary to good investment judgment. The wise investor seeks these facts... in the reports of listed companies... on the financial pages of the newspapers... at the offices of Member Firms of this Exchange. NEW YORK STOCK EXCHANGE
