Bevin Begins Talks With Arab Leaders

London, Jan. 28 (AP)—Foreign Secretary Ernest Bevin has begun talks with Arab leaders on Middle East problems, including what British government sources said is a program for an anti-communist security system in the Arab world.

They forecast that American and British military strategy eventually would be involved.

The informants expressed belief that Bevin's fear of Soviet ambitions in the Middle East would supersede Jewish-Arab problems in Palestine.

They said Bevin is trying to set up a bulwark against the effects on the Suez canal of a possible guerrilla victory in Greece, and on British-American supremacy in the Mediterranean.

Increasing Utilization of the TIMBER CROP

AT WEYERHAEUSER, "Timber is a Crop"
... following 80-year cycles of harvest, re-growth, harvest, re-growth. The object is to provide a never-ending supply of useful forest products.

It is logical then, that Weyerhaeuser should work to increase the number of useful products to be manufactured from the forest crop... to bring into existence new products, many of them from former waste, which can be successfully marketed. Such developments mean greater returns from the forest, more and steadier jobs.

This increased utilization is the job of the Weyerhaeuser Development Department. Forty scientists and engineers devote their full time to this task. Their work starts in the laboratory with an idea, ends with a going commercialized new phase of the business. On the way to the goal men are trained, materials are chosen, methods are perfected, machines are designed and built and markets are developed. Not the least is the last which means finding buyers who require the new commodity, and giving them an attractive value for their money. New production plants are operating, others are under design and pilot plants are doing business every day, being tested against the time when they will graduate to production plants.

DEPENDENT UPON EACH OTHER...

CUSTOMERS: Weyerhaeuser's success depends on a steady flow of quality products at fair prices to the consumer.

EMPLOYEES: Quality products result from modern machinery, skilled workmen, good wages, good working conditions, and reasonable job security. Fair prices result from willing and productive workers and competent management.

SHAREHOLDERS: As a competitive American business, Weyerhaeuser can survive, and grow, only if it earns fair profits for those who now and in the future provide machines and a continuing supply of trees.

GOVERNMENT: Communities live on payrolls of steady operations. Cities, states, and the nation depend on a flow of taxes from successful businesses.
