Chicago, Oct. 18 (P-Bullish sentiment dominated dealings on the board of trade today. After a somewhat shaky start, the

market started to work higher. It kept right on doing that throughout the session. At one time December wheat p more than a cent, went

up more than a cent, went above \$2.28 for the first time since mid-August. That is the government loan level here for No. 2 hard wheat.

Frost over the mid-west brought some early selling into corn, but that soon was overcome. The market was helped by trade reports that Denmark had purchased 200,000 bushels

of American corn. However, prices in the spot market slump-ed around 1 to 4 cents. Soybeans and lard staged a good rally, aided by an upturn in fats and oils in New York.

Crude vegetable oils advanced 14 to 1 cent a pound. A good demand was reported from refineries and manufacturers for

crude soybean oll. Wheat closed ½-1½ higher, December \$2.27%, corn was ¾-

PERPETUAL TAX EXEMPTION AND FREEDOM FROM REGULATION AIM OF SALEM ELECTRIC

What's behind Salem Electric

"Non-Profit" sham?

The law permits fraternal orders, hospitals, etc., to organize as non-profit corporations free from payment of most taxes that apply to a private business.

When Salem Electric wanted to enter the business of distributing electricity, the organizers hit on the idea of a self-styled

"non-profit" organization. Prestot They avoid almost all of the taxes other electric companies pay. (Salem Electric in 1947 paid 2.6 cents of its income dollar for taxes, other companies pay 17 to 20 cents.) No regulation... because the state's public utilities commissioner does not regulate this "non-profit" organization. So they can refuse extensions into undeveloped districts . . . let the other fellow develop the community.

Salem Electric solicits customers just as

2

a private business. They want all the profitable business they can get.
