

### Big Linn Mill Resuming Soon

Lebanon, April 28—After being closed four months, the Oregon Plywood corporation plant at Sweet Home will open on Monday, May 9, it is announced by Harold M. Buckner, newly appointed plant manager. Official announcement of the plans were made earlier by Franklin A. Hofehins, president of the plywood corporation. The return to work will furnish employment for 150 to 200 men, plant officials say, and production will be put on maximum output.

Employment will first be offered to former plant workers. Remainder of the crews will be filled through the state employment office at Lebanon. Monthly payroll at the company will amount to about \$60,000. The company halted operations during the heavy winter freeze when ice coated the mill pond, closing all logging operations. Revision of the official staff has been made since, the new plant manager being formerly associated with Northwestern Door company in Tacoma as general superintendent.
