

Reminder from State Police

A reminder from your state police: Oregon's new law requiring motorists to stop when encountering a school bus that is loading or unloading children is now in effect.

The law, passed by the recent legislature, makes it mandatory to stop when approaching from either direction a school bus halted on a two-lane road. Vehicles must remain stopped "if and so long as any children are leaving the bus or crossing the highway."

Drivers on three or four lane highways must stop when approaching a school bus from their side of the road.

The law applies to all roads, streets and highways, whether in cities or rural areas.

Initial enforcement will consist of warnings for all but flagrant violators, state police said, but arrests will be made for any later offense.

Plant Operating Upon Double Shift

Unionvale, May 12 — The Grand Island sand and gravel company started two eight hour shifts Monday. There are 23 men employed and 15 travel trucks are in use hauling to the stock piles here. Preparing for road repair work at hand.

The D. and H. paving company of Vancouver, Wash. started Tuesday at the station on the Dayton-McMinnville highway and will repair about 5 1/2 miles south to the Fairview schoolhouse, in the Hopewell area.

Work will start soon repairing the Dayton-Salem highway's worst winter-damaged parts of the highway approximately 12 miles. The distance of about 22 miles from Dayton to Salem has approximately 10 miles that has held up through the winter damage. E. W. Mandigo local manager of the Grand Island Sand and Gravel company reported Wednesday and the repair work is expected to be completed by June 30.

Petroleum Product Firm is Expanding

Lebanon—Expansion of General Petroleum facilities at the Lebanon plant was announced this week by C. J. Vaughan, local distributor.

A building program underway at present will increase tank bulk storage of petroleum products from 25,000 gallons to 105,000 gallons capacity. New buildings include a large warehouse, offices, climatic correct storage room for products needing consistent temperatures, new garages for trucks and a bulk loading dock.

The new loading dock, according to Vaughan, will be capable of delivering 250 gallons per minute into distributing trucks.

The plant will handle eight separate bulk products, including gas oils and by products.

Completion of the building program is expected in about 60 days.

Vaughan assumed control of the local plant four years ago. This unit serves all of central and eastern Linn county.
