

Lebanon Prohibits Open Trash Hauling

Lebanon—Enforcement of an ordinance forbidding trash to be hauled in open vehicles through the city streets has been announced by the city council following a report by the Lebanon safety council. Police will first issue a warning ticket to be followed by summons for disobedience to the city law. Report of volunteer firemen

traveling in reverse direction on one-way streets to get to a fire indicated that no ordinance now is in effect to control the situation. The council will take this matter under advisement.

A check of wells on city property showed that all open shafts had been capped.

Robert M. Rownd Dies
Ripley, N. Y., May 18 (AP)—Robert McKee Rownd, 104, former national commander of the Grand Army of the Republic, died in his sleep early Tuesday.

New Fighter Plane Designed

Burbank, Calif., May 18 (AP)—Details of a long-range, heavy-weight jet fighter, designed to fly and fight deep in enemy territory, were announced Tuesday by the U. S. Air Force and Lockheed Aircraft Corp.

The needle-nosed craft, designated the F-90, made its first taxi runs at 90 miles an hour Tuesday on the 6,000-foot Lockheed runway.

The plane will be shipped later to the Air Force test base at Muroc, Calif., for the first test flight.

Designed to seek out air or ground targets behind enemy lines, the F-90 will rely on speed and maneuverability to avoid trouble.

It is a heavily armored, single seat fighter with twin jet engines. It is almost as heavy as the DC-3, a familiar two-engine airplane transport.

The 40-foot wings sweep back at a 35 degree angle. Rudder and elevator surfaces are raked comparably. The cockpit is set well forward of the wing for visibility. It is pressurized, air conditioned and incorporates a pilot ejection seat.

The F-90's armament and performance characteristics are secret. The ship will be tested for a year at Muroc by Lockheed and Air Force pilots before being turned over to the Air Force.

C. L. Johnson, chief research engineer at Lockheed, said extensive aerodynamic and structural tests during development have answered many questions about the new plane that formerly were available only after testing.

Some \$60,000 was spent on wind tunnel tests and in addition six steel and plastic models were dropped from high flying aircraft and their descent

studied by radar. The model drops furnished about half the informational normally obtained through dive tests, Johnson said.

Unit Taking Holiday

Roberts—The last meeting of the home extension unit was held in the auditorium of the

Portland Gas and Coke company with a sack lunch and generous helpings of the "broiled dinners" which was cooked and served by Mrs. A. D. Cater and Mrs. Keith Austin, the project leaders. Beginning in October the home extension unit meeting date will be changed to the last Thursday of the month.
