

Grand Ronde-From Indians to Industry in 40 Years-Top, section of New Grand Ronde where a new front business section of New Grand Ronde where a new front for an old-time community assumes a modern appearance, facing the highway from Valley Junction to North Lincoln beaches. Bottom, Public housing project of 100 units at New Grand Ronde now entirely occupied by veterans who are mostly engaged in the local lumbering industry.

DIGGING AS A HOBBY

Couple of Railroaders Aid Profs With Finds

They are Al Bennaway, an engineer, and Walter Hayward, a brakeman.

Their apare-time work has unearthed arrowheads and tools as well as skeletons and pottery. Some of them are on loan to Vassar college and a Rochester, N. Y., museum. With the help of professional archaeologists from schools and museums they have been able to learn much

when both were hunting relics, not on their railroad jobs.
Hayward says he started his digging when he was six years into one city was defeated.

settlers.

The railroad men have also been able to help the professors. When, for instance, Dr. Mary Butler Lewis of the University of Pennsylvania made an archaeological survey of the Hudson Valley in the early 1940's, she went first to them.

Paughkeepsie, N. Y. (49)—A couple of railroad men who dig up Indian relics in their spare time have made themselves authorities on the subject.

They are Al Bennaway, an enwhere hunting relics, and Walter Hayward, a not on their railroad jobs.

Taft—Residents of this costal to make another opportunity to decide whether ployes take care of the pond to they prefer to live in an incorporated area. At a special election in April a proposal to incorporate Cutter proposal to

From Indians to industry in 40 years is the story of Grand Ronde where the government closed its blighted Indian reservation in 1908 and where a community of about 900 labored in 1948 to ship 60 million feet of logse and 1700 carloads of lumber.

Though Indians still live at Grand Ronde, where Joel Palmer herded them from all parts of Western Oregon to the reservation some 90 years ago, they have pretty much lost their identity except for the tribal council and work along with their white associates to make this community one of the more with H. B. Scharschmidt as genthis community one of the more prosperous logging and lumber-ing centers in Western Oregon.

Precisely speaking there are two Grand Rondes. Old Grand Ronde, site of the former re-servation headquarters, is on the road leading from Valley Junction to Hebo. Here is located St Michaels school conducted by Michaels school conducted by the Sisters of St. Mary who, as-sisted by Father G. Scheffold, attend to the education of 83 pupils in grades from first to seventh. Next year there will be an eighth. Call this the cultural center of this dual community if you like.

Industry and most of the local pusiness is at New Grand Ronde on the road from Valley Junction to North Lincoln beaches. Here there is a diversity of business dependent upon an extensive lumber industry.

Largest by far among the logging operators is Long-Bell, suc cessors to the Miami corpora-tion since 1943. Their logging operations extend over 14 sections of timber land in this lo cality. Getting out with the logs however, is the work of three subcontractors: Ted Welty, Eld-May Be Asked Again

"On the Corner"

Pictured here, Mr. Kaiser demonstrates

the 2-cars-in-one Kaiser Traveler world's most useful car...⁵2088'

"Here's how we've put 'two cars

in reach of every American family." Here Henry J. Kaiser, Chairman, Raiser-Frazer Corporation

Mr. Kaiser says: "Salesmen, farmers, small businessmen...every thrifty, 1949 American likes to ride in style, but needs a roomy cargo-carrier, too.

"So we designed the Kaiser Traveler, 2-cars-in-1. It's a big sedan seating 6 in sofa comfort, on a 1231/2 inch wheelbase.

"You change the Kaiser Traveler into its 'overalls' in only ten seconds. You use no tools, no bolts. Just fold down the rear seat, open the hatch, drop the tail-gate, and there's a 10-foot steel-shod cargo compartment. With 3 passengers, it gives over 130 cubic feet of cargo space. With 6 passengers, over 78 cubic feet. That's lots of room!

"And there's plenty of power for any job. The quiet, giant-sized Kaiser engine is a real gas-saver, with its highest compression ratio of 7.3-to-1.

"Now why buy any ear that is less useful, when the Kaiser Traveler costs only \$2088*? Write me what you think about it. Address me, Henry J. Kaiser, at Willow Run, Michigan,"
