

Look What Happened!—When Los Angeles Police Officer Kenneth Booth responded to a report that a couple of nudists were cavorting around a back yard he never thought the "case" would end like this. But with the temperature hitting 97, who could blame him? The nudists are Terry Ann Goldman (left) and Dickie Watson. (AP Wirephoto)

Bit of Good News Creeps Into Business Week Review

New York (AP)—A bit of good news, including a 20-year peak in automobile production, popped up last week to take the sting out of generally declining business activity. Some of the brighter news was a result of seasonal factors. Moreover, it was sparsely spread through the economy. Yet it was encouraging after a long period of slow but constant declines. For instance, engineering construction contracts hit the second highest figure of the year. Electric power production reached its best total since early April.

Automobile production added up to the staggering total of 150,948 units, a figure unmatched since the rip-roaring days of '29. In the previous week, output was 146,056, and last year 95,027 units were produced in this country and Canada.

New England woolen and worsted mills reported a pickup in production. In several places idle employees were called back. The Bureau of Labor Statistics reported the cost of living moved down a little during the month ended May 15. The decline in the BLS index was only three-tenths of one percent. Not startling, but enough to give consumers a few more pennies to spend on non-essentials.

The backdrop for the week's encouraging items, however, was the same old decline in all major components of the national economy. Unemployment crept up a lit-

tle. Steel production fell to its lowest level since the week of April 19, 1948—the tenth consecutive week it has skidded. The labor situation became increasingly tense.

Steel negotiations failed to get anywhere. The coal miners began their annual 10-day vacations at midnight Friday, less than a full week after returning from a one-week stoppage designed to "stabilize" the industry.

Perilous Trip Ends
Riggins, Idaho, June 27 (AP)—After an exciting run through the rapids-ripped Salmon river of no return, former U. S. Sen. Henry C. Dworshak and his party of eight docked their scow here Saturday afternoon. The 140-mile trip from Salmon City took a week.

Photo Shows Mountain Scene

Displayed in the lobby of the Capital Journal is an aerial view of the Cascades taken from an altitude of about 13,000 feet just south of the Three Sisters. Photographing the picture was Pacific Pictures.

In the foreground of the photograph are the middle and north Sisters and to the right of the center is Black Butte.

On the left side of the picture at center top are Mt. Washington, Three Fingers Jack, Mt. Jefferson and Mt. Wilson. Above in the distance and to the right

of Mt. Wilson are Mt. St. Helens and Mt. Hood.

Seen faintly in the distance in the picture at the center top is Mt. Adams. Distance from Mt. Adams to the mountains in the foreground, as the "crow flies" is about 140 miles.

Fairview Cemetery Association Elects

Gates—Mrs. Melbourne Rambo was elected director of the Fairview cemetery association to complete the two-year term left vacant when Mrs. Ruby Horner left the district. Mrs. Velma Carey was re-elected director for a three-year term and Mrs. Glen Hennessey returned as secretary-treasurer. Mrs. Velma Carey presided at the meeting.

Birds Can Outspeed Autos, Study Shows

Jefferson City, Mo., (U.P.)—The Missouri conservation commission has determined that the flight speed of game birds was as fast or faster than the pace of modern automobiles. The commission estimated the normal speed of doves at 40 miles per hour; quail, prairie chicken, ruffed grouse, mallard, black duck, spoonbill, pintail.
