### Common Interests Suggest Merger

The more West Salem talks about the merger issue to be voted on next Tuesday the more powerful become the arguments in favor of joining with Salem.

The basic reason for merging the two communities is this: A common government for communities with common interests. Perhaps it could be stated this way: What SIPS FOR SUPPER helps West Salem will help Salem, and what helps Salem will help West Salem. The two cities are so situated geographically that their interests are the same. So merger is merely an admitted step in the growth of the two.

West Salem stands to lose nothing, actually, in a merger. The city hall auditorium would be maintained for civic The city hall auditorium would be maintained for court street management functions for people in that area. City employees would tated it was debe absorbed in the metropolitan area formed. The water cided to close office would be kept in the present city hall in West Salem. up eight windered to come the court of the A new ward would be created in the Salem city govern-ment for West Salem. And legal opinion believes that present franchises on the west side will stand.

Because of the merging of public services for both communities, West Salem stands to gain a reduction in its present city tax of 15.2 mills. The sewage disposal cost for West Salem, if merger goes through, is figured at 65 cents, while otherwise it would be an estimated \$1.25 something like

West Salem would gain full fire protection if merged. But, if the merger were defeated, West Salem would have to pay Salem more or build its own station. To establish fire protection for the west side of the river equivalent to that of Salem's would involve a minimum cost of \$15,000 per year for equipment, depreciation, wages, and training. Such a figure would amount to 21 percent of the present West Salem city budget.

A situation with similar added financial costs is true for water. If a merger doesn't go through, West Salem must build its own water system. And estimates have put the cost at \$100,000, plus three percent interest.

The benefits of merger are found in each consideration.

The benefits of merger are found in each consideration. In insurance, for instance, the difference in rates brought by merger would mean a 10 to 20 percent reduction. Kingly wood annexation which went through last November means West Salem will lose about \$6000 per year in revenue previously received for water use in that area. To enue previously received for water use in that area. To compensate for this loss of revenue, West Salem residents as sure exterminator of mice, all sure of make the necessary arrangements. face a hike in water rates unless merger is voted.

Perhaps the best illustration of the realization of what merger means to West Salem is found in the stand all members of the West Salem city council have taken. All six members have united in favor of merger. The mayor, Walter Musgrave, originated the merger proposal.

It is logical that West Salem and Salem should unite their energies for the good of the area. One city should tie the two together on the banks of the Willamette river and in the heart of the valley.

## Justice Frank Murphy

Supreme Court Justice Frank Murphy, 59, who died of Supreme Court Justice Frank Murphy, 59, who died of a heart attack at a Detroit hospital Tuesday, was an early New Dealer and close friend of the late Franklin D. Roosevelt. He had a long period of public service in various capacities and in his political career came to grips with all the ills of civilization which stimulated the sympathy with the "forgotten man" that is revealed in all of his official acts and court decisions. He held that caring for the unemployed was a national responsibility. unemployed was a national responsibility.

Murphy's public service began as an assistant federal district attorney in 1919 in Michigan after serving in World War I. He was judge of the recorders court in Detroit, 1923-30; mayor of Detroit 1930-33, resigning to become governor-general of the Philippines and later U.S. high commissioner, 1935-36. In 1936 he was elected governor of Michigan, appointed attorney-general of the United States in 1939, and associate justice of the supreme court in 1940.

As governor of Michigan, Murphy was confronted with te responsibility of dealing with a new technique in American labor relations—the sitdown strikes in auto plants. His handling of the strikes brought sharp criticism but he never wavered from his belief that armed labor conflict should be avoided at all costs and he refused to oust the sitdowners from the plants. His handling of the strikes brought snarp criticism but pean struggle note that armed labor conhe never wavered from his belief that armed labor conflict should be avoided at all costs and he refused to up its long crusade against resultly but powerfully dan-world's economy in 1931 and the some subtly but powerfully dan-world's economy in 1949. But oust the sitdowners from the plants. He was defeated for ligious organizations.
