Keizer School Area Slates School Bond Election Soon

Keizer, Aug. 1—Directors of Keizer school district No. 88, Marion county, have posted notices of a school election for August 16, at which time the voters will be asked to approve a bond issue in the amount of \$48,000. Revenue from the sale of the bonds, if approved, will be used for the purpose of either moving and enlarging the old original school building, or for constructing additional classrooms on the new building.

An architect has been engaged to prepare preliminary sketches and cost estimates for the two alternate plans, one of which would involve moving the old school building from its present location inside the U formed by the new building to a new location north of the play shed and behind the Grange hall.

The building would then be raised and four classrooms constructed on the ground floor level which would give the

level of the old building will be smaller than standard size, it is felt that the school plant will be vastly improved by removal of the old school house to a new location.

Although this building is 30-odd years old, it is still structurally sound, and the board members are of the opinion that it is of too great value to tear down even though it may be possible in a few years to construct additional buildings for classroom use. It is believed that the old building removed to a new location and reconstructed as planned, will provide satisfactory classrooms for the next two or three years, and will have a future utilitarian value for a number of years for such purposes as a music room, kitchen and cafeteria, etc.

Removal of the old building to a new location will also permit finishing one classroom and a library room in the back of

from 2 to 8 p.m., Pacific Standard Time in the Keizer school auditorium.

The directors also point out that the new school building has practically reached what is considered to be a maximum desirable size, as completion of the one classroom and library will make a total of 15 classrooms, an auditorium with a seating capacity of between 400 and 500, a kitchen, supply room, principal's office, health room, teacher's room, and the library.

Board members are of the opinion that additional construction of a new building as buildings should not be undertaken on the present site, and in any event can not be considered at this time, because the district can not exceed the legal limitation on its bonded indebtedness. The bond election will be held
