### NO RELAXING AROUND THEM

## Two Dogs, War Souvenirs, Stir Rumpus in New Home

Glassport, Pa. (AP)—The Pater family here can't ignore its German war "souvenirs."

In fact, the family learned soon after arrival of their war veteran son's two Boxer dogs that it would take a heap of training for themselves before they could live in peace. It was some time before they could relax with the none too docile pair around.

The dogs were bought as pups in Germany by Lt. Edwin Pater

ant's mother, she took one look at the snarling pair in their shipping crate and decided they were too much for her to handle. The dogs never had seen a woman before.

Bodo, the male Boxer, had been enrolled in a progressive school for dogs in Germany and was taught to obey commands. The hitch was that the commands had to be spoken in German.

When they were delivered to Mrs. Mary Pater, the lieutenant's mother, she took one look at the snarling pair in their shipping crate and decided they were too much for her to handle.

The Paters soon learned enough German to give commands to their dogs, and Bodo and Abel were taught respect for women by their master.

Discipline now is no problem. The dogs make a daily trip to the grocer's with Mrs. Pater and calmly wait for her outside. They walk with her outside their double leash.

The trip to the grocer is made frequently to keep the huskies in food—eight pounds of it daily. Bodo, only a year old, weighs 65 pounds, and his mate seven pounds less.

The Boxers became accustomed to their surroundings in about a month. Children of the neighborhood who trembled with fear when the pair first arrived now enjoy playing with them.

Capital Journal, Salem, Ore., Tuesday, October 4, 1949—11

The Paters guard their tongues when the Boxers are around, lest they send the dogs flying to attack some passerby. They accidentally might give the German equivalent for "sit 'im!"

Because they have an excellent blood line, Pater expects to use his pair for breeding.

The United States has one of the world's highest accident rates, an annual 87.1 deaths per 100,000 population compared with a world average of less than 50.
