THE TOIL OF DOCTORS and Scientists, free and unhampered, has built American health to the highest level in the world.

Almost all the millions of Americans are honest people, who want improvements and progress in medical care. Your own Doctor, and 125,000 more like him, are daily working step by step toward that end. They are primarily interested in the quality of medical care that saves lives.

Focus the spotlight of your good judgment on the advantages of voluntary selection of your own physician; voluntary selection of the kind of prepaid medical and hospital care that fits your needs, for less than Federal deductions would cost.

Turn that spotlight of honest commonsense on the invariable consequences of Compulsory Health Insurance — lowered quality of health and medical care.
