By J. H. WILLETT of the Capital Drug Store

No one knows when tuberculosis became a killer of mankind. It was apparently a common disease among the early
gyptians; since then it has
wiped out more people than all
the wars in history.

Even today it claims many
victims. But unlike eras past,
now there are medicines and
methods of controlling T.B. if
caught in the early stages.

All that is needed to virtually eliminate this disease is a
chest X-ray for every child and
a dult periodically throughout
life.
