

# Asks Point 4 For Homeland

Washington, Oct. 25 (AP)—Senator Millikin (R-Colo.) called today for a "domestic point four" instead of President Truman's renewed proposal for government protection on U.S. investments abroad.

Mr. Truman said in dedicating the United Nations building cornerstone in New York yesterday he will ask congress in January to give high priority to proposals to speed American technical aid and investments in the world's backward areas.

This was point four of a world program the president outlined in his inaugural address last January.

To carry it out, bills authorizing the export-import bank to guarantee American foreign investments against certain risks will be ready for action by both houses when they return next year.

Millikin, who heads the conference of all republican senators, served notice there will be a fight over the issue.

"I'd much rather see a domestic point four," the Colorado senator told reporters. "We had better start taking some of the handicaps off capital at home, by incentive tax reductions and other methods, before we go into that field abroad."

# Chiang Calls for All-Out War

Hong Kong, Oct. 25 (AP)—Generalissimo Chiang Kai-Shek called today for "total mobilization" against the triumphant Chinese communists because, he said, they will stop at nothing.

His message coincided with reports of three high level conferences to see what the nationalists can do to halt the Red offensive on all fronts.

Chiang spoke at his headquarters on Formosa on the fourth anniversary of China's liberation from the Japanese. He said the big island off the south central coast was destined to be a citadel of resistance against "Russian imperialistic designs," "Russian imperialism, like Japanese imperialism, endeavors to grab Taiwan (Formosa)," he said. "It is seeking to do this on one hand to complete its control of the entire Chinese nation and on the other to turn it into the most strategic forward echelon in its invasion of the western Pacific."

Chinese sources here said Gen. Pai Chung-Hsi, in a meeting with nationalist military advisers yesterday, approved revised strategy for the southwest China campaign.

New plans include a substantial increase of government forces along the Kwangsi-Kwangtung border. Efforts will be made to block the Red pincer movement against the Kweilin area from the north and southeast.

# New Owners for Meat Market

The Tatman & Anderson meat market at Krueger's Kash & Karry, at Center and Lancaster, has been purchased by Lloyd H. Reinwald and Robert F. Pitzer, Sr. The two new owners are well known as Salem meat cutters.

Reinwald has lived in Salem since 1924 and his home is at 3170 South Commercial. He attended Salem schools, and in World War II served 41 months in the army. His first experience in the meat business was with the Werner market, and for the last 2½ years he has been with the Paramount Market.

Pitzer has been a Salem resident throughout his life and lives at 774 South 18th street. During the war he was for 38 months with the army air force. His first experience was at Neptune's market, and since then he has been manager of several meat markets. He has been with the State Street Market in recent years.

# Court Rules on Trial To Be Enforced

In granting a motion for continuance Tuesday in the case of Pemberton vs. Coville which had been set for trial in his court to start Wednesday morning Judge Rex Kimmell said that while it was being granted in this instance in the future it will be very difficult for attorneys to get continuances of cases which have been set for trial.

# Tavern Owners Plan Training

The board of directors of the Oregon Tavern Owners' association, meeting in Portland Monday, voted to establish a class of instruction for new tavern licensees.

Under the tutelage of competent persons they will be instructed in the state liquor control laws and regulations, and in all sanitary requirements for tavern operation.

With the cooperation of the tavern owners' association the liquor control commission, it was reported at the meeting, has decided to compile a manual of the liquor laws and regulations in laymen's language which will be distributed to all licensees in the state.

The association employs a field man who gives full time to checking on taverns and their operating methods and reports directly to Oren Campbell, secretary-manager of the association.

Salem men attending the meeting were Noble Dependehner, a member of the board, and Ethan Grant, editor of Oregon Tavern News.

# Morse Hits at Defense Row

Washington, Oct. 25 (AP)—Sen. Wayne Morse (R. Ore.) today called for an overhauling of the unification law to strengthen the armed forces and put an end to inter-service strife.

Morse said in an interview he believes a senate armed services subcommittee should call all parties concerned into executive session to determine "what needs to be done" to improve unification.

"I am convinced that a strong unification law is essential to both our national security and to economy in government," Morse said.

The Oregon senator, a member of the armed services committee, has long been an advocate of a more extensive merger of the armed forces than has been accomplished to date.

It must be made clear to all branches of the service," he said, "that the people of this country are entitled to full cooperation of each of the three branches."

He said the "time is gone forever" when any one branch of the service, "can conduct itself as though it were an autonomous military establishment."

# Discharges for Drafted Men

Montgomery, Ala., Oct. 25 (AP)—Secretary of the Army Gray today disclosed plans to offer discharges from the army to 30,000 men who entered service under the draft law.

"Upon completion of 12 months' service, these men will be offered immediate separation beginning December 1," Gray said in a speech prepared for the annual conference of the National Guard association. "We anticipate that most of these men will take advantage of our offer."

These men had entered under the draft law's requirement for 21 months' service. Gray said the earlier release had been approved by Secretary of Defense Johnson, who has power under the law to shorten the period of service.

The army secretary made the announcement in telling of steps being taken to reduce the army from 656,000 men to 630,000 by next February.

That part of his speech which dealt with offering earlier discharges to the 30,000 follows:

"We have eliminated one-year enlistments, we have raised the GCT (general classification tests) entrance requirements from 80 to 90, and we plan to return approximately 3,300 reserve officers to inactive duty.

"The main cutback in strength will be accomplished, however—and this is the first announcement concerning this action—the main cutback will be accomplished by release of 21-month inductees and enlistees who came into the army as a result of the selective service law."

Gray said the army, in releasing the men before their originally stipulated term was up, was given new proof that it would not abuse the draft law.

# Jet Airliner's Initial Flight

London, Oct. 25 (AP)—The world's first jet airliner, the De Havilland Comet, whipped from London to Tripoli, North Africa, and back on a maiden overseas flight today at an average speed of about 450 miles an hour.

The 36-passenger plane flew the 1490 miles from London to Sasset Benito, Tripoli, in three hours, 23 minutes, an average speed of about 440 miles an hour.

After a two-hour refueling stop and a check of instruments, the silver plane zoomed back to London in three hours, 13 minutes, at an average speed of about 463 miles an hour.

The 36-passenger Comet is intended for transatlantic service to New York in 1952 or 1953.

# CIO Considers Purging Reds

Cleveland, Oct. 25 (AP)—The CIO executive board met to decide today whether the CIO deliberately is to rid itself of 1,000,000 members under left-wing union leadership.

The answer almost certainly would be an anxious "no"—if there is any way to woo left wing followers away from the rebellious forces.

The CIO has a maximum of 6,000,000 members, and President Philip Murray indicated he wants to keep as many of those under his banner as possible.

But the so-called left-wing movement, spearheaded by a team of resourceful leaders in the United Electrical Workers (UE), and by a canny Harry Bridges of the International Longshoremen's and Warehousemen's union, was expected to put up a serious challenge.

Murray's involvement in an economy-rending strike of 558,

# Chewing Gum May Empty Dental Office

Palm Springs, Calif., Oct. 25 (AP)—A gum chew a day will keep the dentist away.

This may be the slogan of new chewing gums which will be on the market within a month, says Dr. Robert G. Kesel professor of dentistry at the University of Illinois and developer of ammoniated dentifrices.

Dr. Kesel told 200 fellow dentists at the sixth annual dental medicine seminar here yesterday that the new gum will contain dibasic ammonium phosphate and urea. They are the bacteria killing ingredients found in many new tooth pastes and powders.

# Red Armies in East Europe

London, Oct. 25 (AP)—Russia has moved 235,000 fresh troops into eastern Europe in the past few months to help stamp out a vast " Titoist" underground as effective as the French war-time Maquis, a western intelligence source said today.

The source, who returned from the Balkans during the past week, said the underground is composed chiefly of anti-Soviet communists whose immediate aim is to terrorize the Communist leaders of their own countries.

He said many minor Communist officials have been murdered recently in Bulgaria, Romania, and Hungary and that only last month an attempt to assassinate President Klement Gottwald of Czechoslovakia failed "by a few minutes."

The source, who cannot be identified, said Gottwald and other Czechoslovak officials were enroute to northwestern Bohemia by train. A bomb exploded on the track a few minutes before their train reached the town of Louny. Gottwald cancelled a scheduled speech and returned to Prague, the source said.

# No Xmas Trees From Christmas

Washington, Oct. 25 (AP)—The post office says it's sorry but the postmaster at Christmas, Fla., has to quit stamping tiny green Christmas trees on letters mailed from there.

The UE executive board in New York voted to throw its financial resources behind both the steel and coal strikes—following the earlier idea of John L. Lewis.

In a long telegram to the president, J. Atlee Schafer of Cleveland, president of the association, said:

"In hundreds of communities there is no supply of domestic fuel available for thousands of customers dependent upon our industry for fuel.

"Colder weather is on its way. Only the unseasonable weather of October to date, far warmer than normal, has prevented an earlier crisis.

"We feel that a national emergency in the bituminous coal consuming area exists right now."

Failure by the president to act immediately, Schafer said, "will result in tragic consequences for the people of the United States."

**Meets 'Air-Born' Son**—U. S. Air Force Sgt. James C. Parker of Alderson, W. Va., holds his son, Miodrag, born early this week on airliner 19,000 feet up and 400 miles out over the Atlantic ocean on flight from New York, at reunion with his wife in nursery of country hospital at Shannon, Ireland. The soldier's wife, Darinka, Yugoslav-born GI bride, selected the name Miodrag which is Slav name meaning "Darling" but Sgt. Parker added that he thinks the boy should have good American name like Bill, Tom or Jack, too. (AP Wirephoto via radio from London)

# Coal Shortage Growing Acute

Chicago, Oct. 25 (AP)—A spokesman for retail coal dealers said today that a national emergency exists in the supply of soft coal for home heating. He urged President Truman to act at once to end the coal strike.

The appeal for "immediate steps" by the president came from the American Retail Coal association. It said that with colder weather coming the coal supply "emergency is far greater" than the steel strike situation.

In a long telegram to the president, J. Atlee Schafer of Cleveland, president of the association, said:

"In hundreds of communities there is no supply of domestic fuel available for thousands of customers dependent upon our industry for fuel.

"Colder weather is on its way. Only the unseasonable weather of October to date, far warmer than normal, has prevented an earlier crisis.

"We feel that a national emergency in the bituminous coal consuming area exists right now."

Failure by the president to act immediately, Schafer said, "will result in tragic consequences for the people of the United States."

# White Supremacy College Endowed

Washington, Miss., Oct. 25 (AP)—Jefferson military college has qualified for a \$50,000,000 bequest by agreeing to teach white supremacy.

The school's announcement last night came from A. J. Armstrong, business manager and son of George Armstrong, benefactor of the 102 year old prep institute.

The college declined to publicize its enrollment, but estimated

# Mike Elliott Hunting Elk

Prineville, Oct. 25 (AP)—Mike Elliott, recalled sheriff of Multnomah county, is thinking about elk, not politics. He and his friend, James Dady, spent the night here and this morning said they were going elk hunting in Grant county.

# Teachers Hold Final Sessions

The second and concluding day of the high school and elementary school conference Tuesday was devoted in the main to departmental meetings during the forenoon hours.

On the high school level these meetings were devoted to a variety of subjects including administration, agriculture, art, business education, foreign languages, health and physical education, home economics and music. The elementary teachers discussed social studies.

E. A. Carleton, principal of Salem senior high, presided during the afternoon conference held in the auditorium. A panel discussion devoted to "Private Industry and the Conservation Problem," took up much of the time. Panel members were Walter DeLong, of the Weyerhaeuser Lumber company and Art King, soil conservationist of the OSC extension service.

# To Curb Dance Hall Licenses

The county court Tuesday declared a policy of issuing no more special permits for dance hall licenses and in the future those seeking them must obtain regular permits in the regular manner prescribed for dance hall license permits.

The matter arose on request of the American Legion auxiliary at Idanha for such a permit for a dance to be held some time in November. A firemen's benefit dance was granted a special permit by the court in the Detroit area at the time of the bridge dedication. Then came a request for such a permit for another dance on October 28 which was granted. The requests, the court decided, were coming in too thick and fast and hereafter they will all be treated as applications for regular permits subject to the same regulations. The latest one from the legion auxiliary will be referred to the sheriff for investigation, which is part of the routine followed with such regular permits.

# Motorcyclist Hits Store Window

Gary Green, 1454 Hickory, was cut about the head, shoulder and right forearm Monday night when he lost control of his motor bicycle and crashed into a store window on Highland avenue.

Heavy fog at the time added to the hazards which prepared the accident situation. An auto, which turned left in front of Green, caused him to veer sharply, losing control of his bike.

He crashed through the window of the Highland Market at 800 Highland avenue. His cuts were treated by a physician to whom the youth was taken by the autoist who had cut in front of him.

# Southern Pacific Sues Geo. Flagg

Southern Pacific company in a suit instituted in circuit court here against George H. Flagg, public utilities commissioner, seeks to set aside an order of the commissioner which would compel the railroad company to replace an overhead crossing in Klamath county known as Texam Overhead crossing.

The complaint avers that the commissioner has no power to compel the company to construct any structure for use as a highway across its right of way without the consent of the railroad company.

Further it is asserted the commissioner in including a specification it is to be built "to the satisfaction of the county court of Klamath county" is an unlawful delegation of his powers. The railroad company says that the statute limits the powers of the commissioner to "permitting" an overhead structure to be built across a railroad track and that his order is void because it is mandatory in nature.
