#### **Easing Racial Bans**

Solicitor General Philip B. Perlman, with the backing of President Truman, has announced a new government move to curb racial and religious discrimination in future housing projects, which will be denied federal aid if they write clauses against tenants of any color or creed. This is of course another bureaucratic usurpation of legislative power, for there is no law to this effect passed by congress.

power, for there is no law to this effect passed by congress. As announced, the new government policy affects FHA financing guarantees for housing projects or one unit dwellings; GI loans for veterans' housing; slum clearance projects and land transactions by public agencies. The new policy is for purely political effect, for it means little real change in present bans against minorities, cannot be retroactive or prohibitive against unwritten restric-tions, and no date has been set for it to become effective. Is a different for the administration's device for output policy house It adds little to the administration's drive for existing bans against minorities.

The FHA does not grant loans to buyers or builders. It in-sures bankers against loss on such loans, providing certain con-ditions are met in the construction and financing of the dwell-igs. Few projects would be affected. Only about a third of new home construction has been financed under FHA guaran-tees.

Mr. Truman is going ahead with his plans to force his civil rights bill in congress, which includes a federal anti-lynching law, repeal of the poll tax law as a voting require-ment and other bills designed to ban discrimination against Negroes and other minority groups.

more vital legislation—and all to win the northern Negro living things in our world.

Meanwhile the status of the Negro is gradually improv-ing, especially in the south where racial prejudice, a hang-over from slavery, still exists, but a more enlightened policy is being followed than ever before. The Negro is better treated, better educated and looked after than ever before. It is really a state and local, not a national prob-lem. There are few lynchings nowadays, and Negro merit is nationally recommized is nationally recognized.

"I was told that musical ther-aphy was helpful to the 1,000,-

Miss Tennyson, helped only by a secretary, schedules the concerts herself and pays all expenses of the operation. When-ever the seasonal tour of one of the artists on her list brings him near a veterans' hospital, she arranges in advance for him to appear there, too.

In that latter sentence he put an American idea that has Just an Average Driver

In that latter sentence he put an American loca that has been almost put in the discard by the present federal ad-ministration philosophers. When Eisenhower makes such statements, he finds to his "surprise" that they bring a great response. It is time that he realize he is building himself up in the minds of many Americana as a logical candidate for president in Rahv Shower for Oregon Couple 1952. Whether he approves or not of such a response from the general public that would consider him as such. he nevertheless assumes the stature of a popular choice. He finds himself in the unusual position of a leader who feels he must make certain statements and observations and yet, at the same time, says he doesn't want to run for president.

His faith in free man was expressed in early June in his first address as president of Columbia university. He at-tacked modern preachers of the paternalistic state in his commencement address. Later he brought his ideas together in a more definite political pattern, described by him as "middle of the road."

For a man who is not interested in politics for himself, Eisenhower talks with too much conviction of principles which are taking a beating these days. A man with such deep feeling and with such a past record of leadership, can-not escape the call of the people of America. Those people, floundering in the present mediocrity of the republican party, are seeking desperately for a leader around whom the forces in opposition to Truman might raily. The more Eisenhower talks the more he sounds like that man,
