Dick Dunkel's College Basketball Power Index

EXPLANATION—The Power Index provides a direct comparison of the relative strength of any two teams for this season to date. Thus, a 50.0 team has been 10 scoring points strong r than a 40.0 team on their comparative records, in which scoring margin has been weighed against strength of opposition. This does not necessarily mean that a 50.0 team should defeat a 40.0 team by exactly 10 points in the uture. Teams rarely follow past performance that closely. Furthermore, the ratings are not adjusted for such factors as home court, injuries and ineligibilities. The Dunkel system correlates records of all college teams and was started in 1929.
