Congratulatory Kiss Paul Pettit, 18-year-old south-paw plicher who recently grad-uated from high school, gets a congratulatory kiss from his sweetheart, Shiriey Jennings, after signing a contract with the Pittsburgh Pirates in Los Angeles. The price for Pettit was reported to be in the neighborhood of \$100,000. He will play with the Pirates' farm team at New Orleans this season.

Letters Show Black and White of Sports Subsidy

White of Sports Subsidy

By HUGH FULLERTON, JR.

New York, Feb. 3 (#)—Two letters in the same mall—from a fairly small southern college that would like to hit bigger time: "We recently started intercollegiate boxing and it is going over big. Should you run across a good amateur heavyweight who's interested in college, tell him to write us—we pay tuition, room, board, books, laundry and ten bucks per month—all of it over the counter. The same holds true of basketball and football players."

Med his biggest splash with a football players."

Non-Sked Tread

J. B. "Fenders" Whitworth (Oklahomans think his old nick name of "Ears" is inadequate) gives this rough version of what happened just after he took the Oklahoman A&M football coaching job: "I arrived in Oklahoman and faced a quick tour of the state. So I made the trip and gove three little talks. When I got back they had added Arkansas to the schedule as an opener. So I made three-four more little tears that the remaind books. The species and the received by the continuation of the state. So I made the trip and gove three little talks. When I got back they had added Arkansas to the schedule as an opener. EXPLANATION—The Power Index provides a direct comparison of the "elative strength of any two teams for this season to date. Thus, a 50.0 team has been 10 scoring points stron r than a 40.0 team on their comparative records, in which scoring margin has been welghed against strength of opposition. This does not necessarily mean that a 50.0 team should defeat a 40.0 team by exactly 10 points in the uture. Teams rarely follow past performance that closely. Furthermore, the ratings are not adjusted for such factors as home court, in, uries and incligibilities. The Dunkel system correlates records of all college teams and was started in 1929.

Only about four more weeks of this, and we'll know the ap proximate answer to the 1950 college basketball question.

college basketball question.

Meanwhile, we can take a look at the road that lies ahead of the currant leaders. Their chances can be judged by comparing stream tenders with those of the coming opponents listed below.

Chances? That will depend on games is one thing, but a team's wanter with the coming also depends on strength of schedule.

We laughingly expect these ratings to hold up. But at the same time, the place to look for possible booby-traps is where game to be played on a foreign
