Number of Dangerous Drugs Alarms Federal Agency

Washington, Feb. 6 (F)—The food and drug administration ex-pressed alarm today over an increase in the number of danger-

ous drugs it has found on the market.

It also noted a rise in the careless use of the deadly rat poison 1080.

At the same time, however At the same time, however, the agency pointed out that "to poos short on eggs, olive oil hair the credit of the American food, drug and cosmetic industries as a whole," better supplies of these products are available than ever before.

The angual report Commissionary and sheep.

inese as some of the difficulties he has run into in the past fiscal year:

1. The increase in coffee prices led to attempts to salvage coffee "to the last bean."

The administration seized five large lots of sweepings—beans spilled from broken bags in ship holds and on docks—some of them containing "half their weight in unspeakable fillth."

2. DDT is still found in dairy barns. The agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that there will be "no total agency reaffirmed its position of last fall that ther

ship holds and on docks—some of them containing "half their weight in unspeakable filth."

2. DDT is still found in dairy barns. The agency reaffirmed its position of last fall that there will be "no tolerance for DDT in milk, because it is a poison that is not required in good dairy farm practice."

3. Shipment of short-weight products such as gift peakages little more than half full, and honey-rum-brandy cakes with little honey and no rum and brandy. (But the agency reported that although 14 shipments of candy were seized as short weight, "in general the proportion of the candy to the package in candy bars is improving.")

4. The use of "naked" raspberry seeds in pie fallse impression that it con
