When Cadillac says New... it's News!

When Cadillac announces that basic changes have been made in its design, it means the Standard of the World has once again been raised.

And that, of course, is news of the first magnitude. This year, the number of Cadillac changes is far, far greater than is normally announced.

There is, of course, glamorous new beauty! All the bodies have been completely restyled and redesigned and are simply gorgeous in their line and contour.

The great new Cadillac high-compression engine has undergone a host of refinements which enhance every phase of its performance.

Road balance and handling ease are remarkably improved. Steering is easier; braking is softer; and the car's stability on turns and curves is phenomenal. Almost all the effort has been taken out of driving.

Yes—this is a Cadillac "vintage" year—when its engineering and designing and manufacturing have all produced at their superlative best.

Better come in—and come up... to Cadillac.
